COVID-19 RISK REGISTER GOLD COMMAND 24th May 2021

Aligning Risk with Swansea Bay University Health Board (SBUHB) Strategy

The Swansea Bay University Health Board (SBUHB) strategy is outlined in the figure below and all risks identified for inclusion on the Health Board Risk Register are mapped to our enabling objectives.

COVID-19 RISK REGISTER
DASHBOARD OF ASSESSED RISKS – GOLD COMMAND

Impact/Consequences	5	R_COV_004: Covid Related Sickness Absence	R_COV_008: Capacity Moved to OSG R_COV_009a: Workforce Shortages R_COV_010: Delivery of Essential Care Moved to OSG	R_COV_015a: Mass Vaccination (Medium Term) R_COV_19a: Opening of Field Hospital (revised model - December 2020)	R_COV_012: Partnership Working – Moved to HBRR R_COV_18: Whole-Service Closure – Moved to HBRR	R_COV_20: Workforce Resilience Moved to HBRR
	4	R_COV_009b: Workforce – Recruitment-Closed R_COV_013: Test, Trace and Protect Moved to TTP cell		R_COV_005: Care Homes R_COV_003: Inadequate supply of PPE R_COV_015b: Mass Vaccination (Short Term)	R_COV_17: Nosocomial Transmission Also on HBRR	
	3					
	2		R_COV_001: Shortage of Critical Care drugs Moved to Medicines Management R_COV_002: Shortage of Palliative Care drugs Moved to Medicines Management

❖ Please note that some risks are deemed closed but may re-open if 2nd or 3rd wave occurs

SBU Health Board COVID-19 Risk Register – GOLD COMMAND

COVID 19 Risk Register Dashboard

Risk Reference	Datix ID	Description of risk identified	Initial Score	Current Score	Trend	Controls	Last Reviewed	Scrutiny Committee
R_COV_001	2367	Shortage of critical care drug - Reduced from 15 to 4 Global shortages which is affecting the UK of a number of drugs/ fluids to manage patients cared for in critical care areas could restrict number of people able to be supported in critical care unit and restrict capacity to enact full COVID critical care response plan - Moved to Medicines Management	25	4	↓	→	10.05.2021	Gold Command COVID-19
R_COV_002	2368	Shortage of Palliative Care Drugs - Reduced from 15 to 4 National shortage of palliative care drugs and access to syringe drivers which could impact on ability to provide timely care for patients at home or in hospital; causing pain for patients and distress for patients and their families. Inability to access drugs for patients at home could impact on hospital sector if these patients subsequently require hospital admission. Distress for patients in families in not being able to die in their place of choice. - Moved to Medicines Management	25	4	↓	→	10.05.2021	Gold Command COVID-19
R_COV_003	2378	Inadequate Supply of PPE - Reduced from 15 to 12 Inadequate supply of PPE could place staff at risk of harm and an increase in the number of staff infected will increase absence rates, resulting in difficulties in staffing core capacity.	25	12	↓	→	24.05.2021	Gold Command COVID-19
R_COV_004	2369	Covid related sick absence Number of staff who are absent from work through self-isolation or family illness will impact on ability to deliver safe care for patients; and will impact on ability to keep capacity open and to staff surge and super surge capacity. NOTE This risk ONLY captures the total of staff absence as reported weekly to WG risk score reflects the position in comparison with wave one position which peaked at 1700 staff absent.	25	5	↓	→	24.05.2021	Gold Command COVID-19
R_COV_005	2370	Care Homes Potential failure in local care home sector to manage staff absences could result in emergency closure of care home which will place undue pressure and therefore on community health and social services to support and/or lead to an increase in patient admission to hospital. Risk of patient harm if care homes are not adequately covered.	25	12	↓	→	24.05.2021	Gold Command COVID-19

R_COV_006	2371	Equipment Shortages (Currently closed) Inability to secure adequate supply of equipment to support phases of capacity plan which may restrict ability of Board to respond to peaks in pandemic if not mitigated. This includes availability of ventilators, CPAP, suppliers, syringe drivers	25	10	→	↓	30.11.2020	Gold Command COVID-19
R_COV_007	2372	Oxygen Provision (Currently closed) Capacity constraints on oxygen provision at Morriston will limit number of ventilator, CPAP and high flow oxygen beds. Lack of ability to secure direct suppliers via BOC will hamper plans for oxygen provision within field hospital	25	10	→	↓	30.11.2020	Gold Command COVID-19
R_COV_008	2373	Capacity – Reduced from 20 to 10 and Moved to OSG Capacity requirements against national modelling mean that the HB capacity may be either insufficient to cope with demand of 2nd surge, resulting in an inability to care for patients as well as an increased risk of excess death.	25	10	↓	→	10.05.2021	Gold Command COVID-19
R_COV_009a	2374	Workforce Shortages Measures the risk to service provision, deployment plans and HB strategic workforce related developments i.e. surge capacity, field hospital / Imms programme in the context of the number of available staff. Factors impacting cover Covid and general sick absence, deployment restrictions relating to staff covid risk assessment, general turnover, Outbreaks. Key risk areas where specific workforce shortages impact is the greatest e.g. ITU, A&E, Covid wards are reflected in the overall score.	25	10	→	→	24.05.2021	Gold Command COVID-19
R_COV_009b	2534	Workforce Recruitment – Reduced from 8 to 4 and Closed Despite efforts to recruit staff into substantive, agency, bank and other roles the HB fails to meet the expanding requirement to replace staff covid related or increase staff resource as a consequence of new staff resource needs. The workforce staff recruitment/supply risk has been assessment NOT just against the existing HB plans which had already highlighted the HB difficulties with staffing super surge. The risk score reflects the risks with meeting every and all existing 5confirmed requirement. The risk includes the internal risk given the pressures on relatively small departments who need to support recruitment. There is significant pressure on the pool of Non registered staff in the SW of Wales with HBs and LA all recruiting from the same pool, this impacts not only on the availability but quality of candidates.	25	4	↓	↓	10.05.2021	Gold Command COVID-19

R_COV_010	2375	Delivery of Essential Care Reduced from 20 to 10 and Moved to OSG Following the guidance to step down routine activity issued by Welsh Government and the pandemic Health and Social Care Response Plan, the R&R programme was overseeing the restart of routine and essential services. Some services remain significantly under pre-covid capacity. There is a risk that the delivery of essential and routine services will be disrupted again through a 2nd peak in COVID admissions and levels of service delivery will need to be adjusted to support the covid response.	25	10	↓	→	10.05.2021	Gold Command COVID-19
R_COV_011	2376	Workforce Risk assessment tool (Currently closed) There is growing evidence that COVID-19 is having a disproportionate impact on individuals from BAME backgrounds. The evidence continues to evolve but the UK Intensive Care National Audit and Research Centre findings on critical care published on 24th April 2020 and the data on BAME deaths published in the Health Service Journal on 22nd April provided sufficient evidence to indicate that individuals from BAME backgrounds may be at disproportionate risk from poorer outcomes from COVID-19.	25	10	→	↓	30.11.2020	Gold Command COVID-19
R_COV_012	2377	Partnership Working Reduced from 25 to 20 and Moved to HBRR There are growing tensions between the Health Board and some trade union partners within SBUHB particularly in response to the supply of PPE which has the potential to create unrest in the workforce and hamper an effective response to COVID-19.	25	20	↓	↓	10.05.2021	Gold Command COVID-19
R_COV_013	2388	Test, Trace, Protect Reduced from 5 to 4 and Moved to TTP Cell The TTP programme is operational and staff have been recruited to both regional and local teams. There is a risk that there will be insufficient capacity locally to contend with significant or prolonged outbreaks and the sustainability of the service is a concern given the temporary nature of deploying people from core roles. There is also a risk that testing capacity may not be sufficient to deal with sudden upsurges in demand. Longer laboratory times will negatively impact on the effectiveness of contact tracing.	20	4	↓	→	10.05.2021	Gold Command COVID-19
R_COV_014	2456	Key worker support from schools Reduced from 15 to 3 (Currently closed) Both Swansea and NT Local Authorities have indicated they do not have plans to provide key worker support over the 6-week summer break. As some staff may not be able to access the support they would have normally have relied upon during this period due to Covid restriction, these staff may have no options but to remain at home to care for their children. Existing policy during the pandemic was that we did support staff in these circumstances by providing basic pay only.	15	3	→	↓	30.11.2020	Gold Command COVID-19

R_COV_015a	2457	Mass Vaccination (Medium Term) The Health Board will need to plan a mass vaccination programme for COVID-19 vaccine alongside management of the annual influenza programme. This will present a number of challenges, including workforce availability, logistics and supply, parallel delivery with the influenza programme and the constraints around co-administration, as well as administrative and information management considerations. Planning parameters have been released by Welsh Government. The most significant risk in the delivery of the programme is in securing sufficient workforce and the availability of a digital solution that provides an end to end information system to establish the programme.	20	15	↓	→	24.05.2021	Gold Command COVID-19
R_COV_015b	TBC	Mass Vaccination (Short Term) Reduced from 16 to 12 The Health Board will need to plan a mass vaccination programme for COVID-19 vaccine alongside management of the annual influenza programme. This will present a number of challenges, including workforce availability, logistics and supply, parallel delivery with the influenza programme and the constraints around co-administration, as well as administrative and information management considerations. Planning parameters have been released by Welsh Government. The most significant risk in the delivery of the programme is in securing sufficient workforce and the availability of a digital solution that provides an end to end information system to establish the programme.	20	12	↓	→	24.05.2021	Gold Command COVID-19
R_COV_016	2491	Bed Spacing (Closed) Guidance was issued by WG in July setting out minimum requirements in respect of bed spacing between hospital beds. As a result of a detailed risk assessment carried out at Board level, the Board will not be able to fully comply with this guidance in respect of a minimum 3.6m mid to mid bed, and 3.7m between from bed head to middle of space across to opposite bed. This increases the potential risk of nosocomial transmission. If beds are withdrawn from use due to non-compliance with the minimum standards, then this introduces risk around the loss of capacity and potential for patient harm to be caused across the system due to flow issues.	16	12	→	↓	01.02.2021	Gold Command COVID-19
R_COV_017	2521	Nosocomial transmission Reduced to from 20 to 16 Also on HBRR Nosocomial transmission in hospitals could cause patient harm; increase staff absence and create wider system pressures (and potential for further harm) due to measures that will be required to control outbreaks.	25	16	↓	↓	24.05.2021	Gold Command COVID-19
R_COV_018	2522	Whole-Service Closure – Moved to HBRR Risk that services or facilities may not be able to function if there is a major incident or a rising tide that renders current service models unable to operate	25	20	→	→	10.05.2021	Gold Command COVID-19

R_COV_019a	2567	Opening of Field Hospital (revised model - December 2020) Risk of patient harm if the field hospital is opened without adequate assurance that the clinical and workforce models are robust and that appropriate policies and procedures are in place	25	15	↓	→	24.05.2021	Gold Command COVID-19
R_COV_019b	2568	Opening of Field Hospital (revised model - December 2020) (CLOSED) Risk of patient harm if the field hospital is opened without adequate assurance that the clinical and workforce models are robust and that appropriate policies and procedures are in place	25	20	↓	↓	20.04.2021	Gold Command COVID-19
R_COV_020	2569	Workforce Resilience (added 16/12/20) – Moved to HBRR Culmination of the pressure and impact on staff wellbeing - both physical and mental relating to Covid Pandemic. Local prevalence of Covid infections increasing positive testing and the debilitating effect of the second wave impacting staff. Impact direct in terms of covid / related sickness (symptomatic Absence) and self-isolation (Asymptomatic). Increased staff absence impact on the pressures for those still in work.	25	25	→	→	10.05.2021	Gold Command COVID-19

Datix ID Number: 2367	R_COV_Strategic_001								
Risk: Shortage of critical care drugs Global shortages which is affecting the UK of a number of drugs/ fluids to manage patients cared for in critical care areas could restrict number of people able to be supported in critical care unit and restrict capacity to enact full COVID critical care response plan. Drugs used to manage the critical care of these patients are required in much higher doses than standard care.	Director Lead: Richard Evans, Medical Director								
	Assuring Committee: Gold Command COVID-19								
	Date last reviewed: 10 th May 2021								
	Moved to Medicines Management Risk Register								
Controls (What are we currently doing about the risk?)	Mitigating actions (What more should we do?)								
<ul style="list-style-type: none">Monitoring mechanism in place for critical care drugs.Lack of hemofiltration fluids across the UK escalated to ECCW on 18/04/20.Assessment of further local contingency plan to be undertaken week beg 20th April 20	Action	Lead	Deadline						
	Escalate to WG via critical care network to seek mutual aid in event of drug shortages; ongoing liaison with WG and suppliers.	Clinical Director Pharmacy	Weekly ongoing						
Assurances (How do we know if the things we are doing are having an impact?) <ul style="list-style-type: none">Executive monitoring/support to achieve improvement plans on a weekly basis.	Gaps in assurance (What additional assurances should we seek?) The need to deliver sustained service.								
<div>Current Risk Rating 2 x 2 = 4</div> <table><tr><td>Initial Risk</td><td>25</td></tr><tr><td>Current</td><td>4</td></tr><tr><td>Target</td><td>10</td></tr></table>	Initial Risk	25	Current	4	Target	10	Additional Comments Monitoring mechanism in place for critical care drugs. Access to priority medicines dashboard with a formalised mutual aid agreements between HBs supported by Health Courier Wales. Situation improving due to UK government working to create new supply routes alongside ongoing work to reduce waste, increase production of ready to administer medicines and the availability of unlicensed medicines. Anxiety remains about the potential of further peaks alongside the recommencing of routine care. National guidance on the essential role of medicines in recommencing routine care is expected and will reiterate the importance of organisations ensuring that any procedure which requires an anaesthetic, sedative, analgesic or neuromuscular blocker has assessed that the Medicines are available and can be replenished, if not that there are readily available substitutes and that stocks are sufficient to manage any emergency requirement for these drugs such as in the case of Covid 19. SBU pharmacy team have a four day buffer stock which will be kept to manage any emergency situation. There are ongoing discussions between DOH and pharmaceutical manufacturers to develop a 6-week buffer stock for the UK in anticipation of no deal Brexit, thus risk remains Amber currently. Discussion at Gold 28.08.20: No alteration to post-MA risk score required currently. National procurement exercise ongoing to stockpile supplies. Deadline for completion was 10.08.20. Consider revision of score once assessment is available to consider. Discussion at Gold 18.09.20: No alteration to post-MA risk score required currently. 16.10.20 - Remdesivir availability: manufacturer have signed a joint procurement agreement with EU to ensure improved availability for at least the next six months. The manufacturer has indicated that they		
Initial Risk	25								
Current	4								
Target	10								

expect to be in a position to meet global demand by the end of Oct 2020. The position of UK and the JPA with EU will also be monitored in the event that there is an impact resulting from Brexit arrangements in 2021. There are ongoing discussions between DOH and pharmaceutical manufacturers to develop a 6-week buffer stock for the UK in anticipation of no deal Brexit, thus risk remains Amber currently.

Discussion at Gold 29.10.20: No alteration to post-MA risk score required currently.

Discussion at gold 06.11.20: No alteration to post-MA risk score required currently. These remain under tight review with Brexit looming.

Discussion at Gold 13.11.20 & 23.11.20: No alteration to post-MA risk score required currently.

Discussion at Gold 30.11.20: No alteration to post-MA risk score required currently.

Discussion at Gold 11.12.20: No alteration to post-MA risk score required currently.

Discussion at Gold 21.12.20: No alteration to post-MA risk score required currently.

Discussion at Gold 07.1.21: No alteration to post-MA risk score required currently.

Discussion at Gold 24.1.21: No alteration to post-MA risk score required currently.

Discussion at Gold 01.02.21: No alteration to post-MA risk score required currently.

Discussion at Gold 08.02.21: No alteration to post-MA risk score required currently.

Discussion at Gold 15.02.21: No alteration to post-MA risk score required currently.

Discussion at Gold 22.02.21: No alteration to post-MA risk score required currently.

Discussion at Gold 01.03.21: No alteration to post-MA risk score required currently.

Discussion at Gold 08.03.21: No alteration to post-MA risk score required currently.

Discussion at Gold 15.03.21: No alteration to post-MA risk score required currently as, despite there being no significant issues, there are unknowns in the supply chain.

Discussion at Gold 22.03.21: No alteration to post-MA risk score required currently. Monitoring of issues ongoing in case of impact on supplies to patients.

Discussion at Gold 29.03.21: No alteration to post-MA risk score required currently.

Discussion at Gold 12.04.21: No alteration to post-MA risk score required currently. JV to consider downgrading score in light of stable position across supply.

Discussion at Gold 20.04.21: There are improvements in supply of critical care and palliative medicines. HB Dashboard shows good stock holding and contingency stocks are available. Demand for medicines for COVID and co-morbidities have reduced significantly. Medicines dashboard continues to be monitored daily. Score is downgraded to 4 from 15.

Discussion at Gold 26.04.21: No alteration to post-MA risk score required currently. RW to check with Medicines Management Board if these risks can be closed on the COVID-19 Strategic Risk Log for monitoring via usual Medicines Management channels.

Review 30.04.2021: The Medicines Management (MM) Team is satisfied that the risk may be removed from the COVID-19 Strategic Risk Log. The MM Team continues to monitor drug shortages but has not identified any immediate concerns in relation to COVID. Drug shortages will remain on the Brexit risk log and on Datix, for now.

Discussion at Gold 10.05.2021: No alteration to post-MA risk score required -Closed on the COVID-19 Strategic Risk Log and for monitoring via usual Medicines Management channels.

Datix ID Number: 2368	R_COV_Strategic_002								
Risk: Shortage of Palliative Care Drugs National shortage of palliative care drugs and access to syringe drivers which could impact on ability to provide timely care for patients at home or in hospital; causing pain for patients and distress for patients and their families. Inability to access drugs for patients at home could impact on hospital sector if these patients subsequently require hospital admission. Distress for patients in families in not being able to die in their place of choice. The standard process of the just in case needs to be managed via a just in time approach. Datix ID Number: 2369	R_COV_Strategic_004								
Risk: Covid related sickness absence Number of staff who are absent from work through self-isolation or family illness will impact on ability to deliver safe care for patients; and will impact on ability to keep capacity open and to staff surge and super surge capacity. NOTE This risk ONLY captures the total of staff absence as reported weekly to WG risk score reflects the position in comparison with wave one position which peaked at 1700 staff absent.	Director Lead: Kathryn Jones, Interim Director of Workforce Assuring Committee: Gold Command COVID-19 Date last reviewed: 24 th May 2021								
Controls (What are we currently doing about the risk?)	Mitigating actions (What more should we do?)								
<ul style="list-style-type: none">Operational deployment group now operational to balance staff workforce across current capacity.Field hospital staffing model identified; and will be triggered on basis of move to super surge with deployment in line with agreed minimum staffing requirementsdetail of Mitigating action relating to Recruitment set out in Risk 009a.From early Sept Staff absent for covid reasons self-isolation/shielding or symptomatic started to increase after reducing to less than a third of the peak levels. Symptomatic absence has increased to levels last seen in early June 2020. Asymptomatic absence is fluctuating as there has been significant success in reviewing shielding staff and bringing them back into some role. This is balanced by an increase in asymptomatic absence due to self-isolation. Symptomatic absence has continued to increase but total absence has levelled off in the last three weeks. Fluctuation in numbers this week linked to social distancing issues with medical staff.	Action	Lead	Deadline						
	Workforce silver is leading a recruitment drive to secure additional workforce; robust occupational health service in place to identify and test staff quickly and get them back to work;	Director of Workforce	Weekly ongoing						
Assurances (How do we know if the things we are doing are having an impact?) <ul style="list-style-type: none">Executive monitoring/support to achieve improvement plans on a weekly basis.	Gaps in assurance (What additional assurances should we seek?) The need to deliver sustained service.								
Current Risk Rating 5 x 1 = 5 <table><tr><td>Initial Risk</td><td>25</td></tr><tr><td>Current</td><td>5</td></tr><tr><td>Target</td><td>8</td></tr></table>	Initial Risk	25	Current	5	Target	8	Additional Comments Staff absent for covid reasons self-isolation/shielding or symptomatic continues to reduce to less than a third of the peak levels. Workforce continue to review shielding staff with a view to possible use in priority work that can be undertaken at home. Announcement on paused shielding and changes w/e 16th August likely to see some shielding staff able to return in some capacity. Discussion at Gold 11.09.20: No alteration to post-MA risk score required currently. Watching brief in place due to issues beginning to surface. Discussion at Gold 18.09.20: No alteration to post-MA risk score required currently. Watching brief in place due to increase in numbers over last 10 days. 40 asymptomatic and 47 symptomatic staff, included. Units seeing rise in staff self-isolating with children who are sent home from school ill. This is		
Initial Risk	25								
Current	5								
Target	8								

not currently causing operational issues.

22.10.20 - Symptomatic absence has increased to levels last seen in June 2020. Asymptomatic absence is fluctuating as there has been significant success in reviewing shielding staff and bringing them back into some role. This is balanced by an increase in asymptomatic absence due to self-isolation.

Discussion at Gold 29.10.20: risk needs increasing significantly. Although staffing patterns are different than those seen in the first wave and we aren't near trigger points, there are more services running. This should be reflected as a significantly higher risk as is being reported to WG, particularly in relation to TTP and vaccination. Julian Rhys Quirk progressing plans to escalate the risk, update at next Gold command meeting.

Discussion at Gold 06.11.20: JRQ revised risk as discussed last week. In light of ongoing discussions re workforce, however, the wording may need reframing to capture new themes arising.

Discussion at Gold 13.11.20: JRQ has reviewed this risk which relates to total number of staff.

Discussion at Gold 23.11.20: No alteration to post-MA risk score required currently.

Discussion at Gold 30.11.20: No alteration to post-MA risk score required currently.

Discussion at Gold 11.12.20: No alteration to post-MA risk score required currently.

Discussion at Gold 21.12.20: No alteration to post-MA risk score required currently.

Discussion at Gold 07.01.21: From early Sept Staff absent for covid reasons self-isolation/shielding or symptomatic started to increase after reducing to less than a third of the peak levels. Symptomatic absence has increased to levels last seen in early May 2020. Following a period of accelerated increase in numbers pre Xmas there has been a significant reduction in covid absence over and immediately after the Xmas period. The announcement on shielding has not led to a marked increase in asymptomatic numbers with the possible exception of medical staff at Morriston. Covid absence decreased to 650 the same level as early December. Risk score not adjusted but if reductions continue the score will be reviewed.

Covid absence decreased to below 500 the same level as early November Risk score reduced in line with lower Covid Absence. Asymptomatic absence lowest level since peak of Wave 1.

Discussion at Gold 24.01.21: This has been reduced to red 20 due to staff returning. JRQ to revise again, as required.

Discussion at Gold 01.02.21: This has been reduced to amber 15 to reflect a reduction in the number of COVID-related staff absences to below 350. This puts the risk score in line with that at the point when staffing was last at this level.

Discussion at Gold 08.02.21: No alteration to post-MA risk score required currently.

Discussion at Gold 15.02.21: No alteration to post-MA risk score required currently.

Discussion at Gold 22.02.21: No alteration to post-MA risk score required currently. A watching brief will be required here in light of reports of 2nd dose vaccines causing flu-like symptoms and driving a subsequent increase in staff absence.

Discussion at Gold 01.03.21: No alteration to post-MA risk score required currently. KJ to review by 08.03.21

Discussion at Gold 08.03.21- This had been reviewed and reduced in line with changes to COVID-

	<p>related sickness absence.</p> <p>Discussion at Gold 15.03.21- This had been reviewed and reduced in line with changes to COVID-related sickness absence. Datix ID Number: 2370	R_COV_Strategic_005		
Risk: Care Homes Potential failure in local care home sector to manage staff absences could result in emergency closure of care home which will place undue pressure and therefore on community health and social services to support and/or lead to an increase in patient admission to hospital. Risk of patient harm if care homes are not adequately covered.	Director Lead: Brian Owens, Director of Primary and Community Services Assuring Committee: Gold Command COVID-19		
	Date last reviewed: 24 th May 2021		
Controls (What are we currently doing about the risk?)	Mitigating actions (What more should we do?)		
<ul style="list-style-type: none">HB has provided temporary support to one care home and working closely with social services. Emergency care home procedure in place enacted via CSSIW.Escalated to WG on 16/04/20 with strong view from WG that HB should not step in unless in extremis.Patients in vulnerable care homes being assessed and actions put in place on individual clinical basis to admit if required. <p>Since April 2020 the Unit has:</p> <ul style="list-style-type: none">Increased our monitoring of care homes;Established weekly reporting of care homes;Manage our hotspots with our partners;Testing of residents and staff has been completed and pathways to testing remain in place.When needed we have stepped in and physically supported the homes.The risk is being mitigated and has reduced from 25 to 20.	Action	Lead	Deadline
	Further plan required from Community Silver on alternative models - e.g. step up care.	Director of Primary and Community Services	Weekly ongoing
Assurances (How do we know if the things we are doing are having an impact?) <ul style="list-style-type: none">Executive monitoring/support to achieve improvement plans on a weekly basis.	Gaps in assurance (What additional assurances should we seek?) The need to deliver sustained service.		
Additional Comments The risk is being mitigated by close monitoring of care home capacity and issues reviewed at the Externally Commissioned Care Group which reports weekly to Community Silver. Also, enhanced multi agency support has been put in to most vulnerable homes to provide short term support which has enabled the risk score to be reduced from 25 to 20. Discussion at Gold 04.09.20: No alteration to post-MA risk score required currently. General risk in sector re capacity. Discussion at Gold 11.09.20: No alteration to post-MA risk score required currently. Increasing concern re cases in sector, however, which are to be monitored closely. Discussion at Gold 18.09.20 & 22.10.20: No alteration to post-MA risk score required currently. Discussion at Gold 29.10.20 & 06.11.20: No alteration to post-MA risk score required currently. Discussion at Gold 13.11.20: No alteration to post-MA risk score required currently. Position within care homes is increasingly vulnerable. Discussion at Gold 23.11.20: No alteration to post-MA risk score required currently. Discussion at Gold 30.11.20: No alteration to post-MA risk score required currently. Discussion at Gold 11.12.20: No alteration to post-MA risk score required currently.			

Discussion at Gold 21.12.20: No alteration to post-MA risk score required currently.

Discussion at Gold 7.1.21: No alteration to post-MA risk score required currently.

Sector remains fragile - weekly regional escalation process established via community silver. Support team established between both LA's and the HB to cover the period over Christmas and throughout Jan 2021 should a home setting require intensive intervention and support. Throughout the current period multiple home's requiring support from LA's and HB.

Discussion at Gold Command 24.1.21: No alteration to post-MA risk score required currently.

Discussion at Gold 1.2.21: No alteration to post-MA risk score required currently.

Discussion at Gold 08.02.21: No alteration to post-MA risk score required currently. BO to advise of any required change following discussion by Community Silver Group which has the full picture for consideration.

Discussion at Gold Command 15.02.21: No alteration to post-MA risk score required currently. CW stated that there is still a risk in this area, despite improvements seen. This is to be monitored with a view to reducing the risk in the near future.

Discussion at Gold Command 22.02.21: In light of the reduction of the community care home risk to 3(12), this is to be reviewed down to an amber 12 outcome. BO.

Discussion at Gold 01.03.21: No alteration to post-MA risk score required currently. BO is happy with this and no further review is required currently.

Discussion at Gold 08.03.21- For review at Community Silver on 09.03.21.

Discussion at Gold 15.03.21- No alteration to post-MA risk score required currently. Community Silver meetings are considering care homes on a fortnightly cycle, thus, this is to remain as it stands until next review by the group.

Discussion at Gold 22.03.21: No alteration to post-MA risk score required currently.

Discussion at Gold 29.03.21: No alteration to post-MA risk score required currently. Risk is reviewed every Tuesday at Community Silver and reflects current position.

Discussion at Gold 12.04.21: No alteration to post-MA risk score required currently. AM to request that Tanya Spriggs reviews the risk, with a view to downgrading, at Community Silver Group.

Discussion at Gold 20.04.21: No alteration to post-MA risk score required currently. For regular review at Community Silver Group on 20.04.21.

Discussion at Gold 26.04.21: No alteration to post-MA risk score required currently. Possibility that this could be picked up outside of Gold, however, this is to be monitored with a view to transitioning the risk. Consideration required of whether COVID remains the main risk to care homes. This is less likely the case in the current environment with more issues identified relating to sustainability and occupancy.

Discussion at Gold 10.05.21: No alteration to post-MA risk score required currently: Agreed to retain FAO of Gold.

Discussion at Gold 17.05.21: No alteration to post-MA risk score required currently:

Discussion at Gold 24.05.21: No alteration to post-MA risk score required currently: Agreed to retain FAO of Gold and to be retained – no change

Risk: Workforce Shortages Measures the risk to service provision, deployment plans and HB strategic workforce related developments i.e. surge capacity, field hospital / Imms programme in the context of the number of available staff. Factors impacting cover Covid and general sick absence, deployment restrictions relating to staff covid risk assessment, general turnover, Outbreaks. Key risk areas where specific workforce shortages impact is the greatest e.g. ITU, A&E, Covid wards are reflected in the overall score.	Director Lead: Kathryn Jones, Interim Director of Workforce Assuring Committee: Gold Command COVID-19 Date last reviewed: 24 th May 2021		
Controls (What are we currently doing about the risk?)	Mitigating actions (What more should we do?)		
<ul style="list-style-type: none">Rolling programme of recruitment to Registered Nurse and HCSW bank staff and Bank A&C. TTP risk captured elsewhere.All bank only staff have been approached with an option to move to a FT contract. Service groups are undertaking their own recruitment to substantive roles.Overall the pool of potential recruits is being accessed as much as is possible.Training capacity has been increased for HCSW Induction to maximum levels, some issues remain with MH training which are being addressed.Corporate Recruitment drive to secure additional workforce across substantive, bank and agency underway externally and internally. Robust occupational health service increased and in place to support staff in terms of general wellbeing. OH supporting internal Track and Trace. Service groups managing their own substantive recruitment to vacancies. Additional recruitment continues to be undertaken as required. Rolling programme of recruitment to Registered Nurse and HCSW bank staff and Bank A&C. TTP risk captured elsewhere. All bank only staff have been approached with an option to move to a FT contract. Overall the pool of potential recruits is being accessed as much as is possible. Training capacity has been significantly increased for HCSW Induction and MH. Deployment plans to assess whether staff can be used more effectively being organised corporately under Operational Management. Workforce data cell to support decision making established which incorporates data gathering (new data) exploiting existing data sources and roster efficiency. Risk score increased to mirror risk score 9b	Action Additional workforce are being recruited through national and local campaigns including the return of retired NHS professionals	Lead Interim Director Workforce	Deadline Weekly ongoing
Assurances (How do we know if the things we are doing are having an impact?) <ul style="list-style-type: none">Executive monitoring/support to achieve improvement plans on a weekly basis.	Gaps in assurance (What additional assurances should we seek?) The need to deliver sustained service.		
Additional Comments Both Medical and Nursing student now deployed within the HB. Plans for recruitment and deployment under regular review to meet service planning as it evolves. Additional recruitment to be undertaken as required. Issues remain with drop-out rates and staff returning to pre Covid roles affected TTP deployment. Due to low activity the TTP workforce requirements on an all Wales basis the requirements have been reduced by 50% for the time being easing the concerns over recruitment in the short term whilst the substantive recruitment continues.			

Discussion at Gold 21.08.20: No alteration to post-MA risk score required currently. Future consideration required for possible revision upwards.

Discussion at Gold 04.09.20: No alteration to post-MA risk score required currently.

Discussion at Gold 11.09.20: No alteration to post-MA risk score required currently. Monitoring pressures on TTP and testing workforce. Possible need for review next week.

Discussion at Gold 18.09.20: No alteration to post-MA risk score required currently. Concerns ongoing; resolution dependent on success of ongoing recruitment.

Discussion at Gold 22.10.20: No alteration to post-MA risk score required currently

Discussion at Gold 29.10.20: This has been reviewed in the last week. Additional workforce has been recruited through local campaigns. Additional recruitment continues to be undertaken as required.

Discussion at Gold 06.11.20: The workforce staff supply risk has been assessed against the existing HB plan which had already highlighted the HB difficulties with staffing super surge. Risk has been increased due in part to evidence that the existing staffing and recruitment plan is being double counted as available resource. Whilst recruitment is ongoing and staff absence has NOT returned to previous levels seen (when matched to current Covid positive patients in the Hospital) concern has increased that reassurance is being incorrectly drawn from current plans. Whilst the pressure to staff the Immunisation programme has helpfully slipped into 2021, the supply of employed registered nurses is fixed. Agency options are being explored.

Discussion at Gold 13.11.20: Reviewed this week by JRQ. Relates to workforce requirements.

Discussion at Gold 23.11.20: DE to discuss with JRQ whether the score of this risk and those of risks 9a and b need to be made consistent. Await instructions.

Discussion at Gold 30.11.20: Physical bed capacity available but the staffing resource is not available to open these beds. Risk increased given the workforce challenges. Operational silver working to mitigate the risk.

<p>Risk: Workforce Recruitment</p> <p>Despite efforts to recruit staff into substantive, agency, bank and other roles the HB fails to meet the expanding requirement to replace staff covid related or increase staff resource as a consequence of new staff resource needs. The workforce staff recruitment/supply risk has been assessment NOT just against the existing HB plans which had already highlighted the HB difficulties with staffing super surge. The risk score reflects the risks with meeting every and all existing confirmed requirement. The risk includes the internal risk given the pressures on relatively small departments who need to support recruitment. There is significant pressure on the pool of Non registered staff in the SW of Wales with HBs and LA all recruiting from the same pool, this impacts not only on the availability but quality of candidates.</p> <p>CLOSED</p>	<p>Director Lead: Kathryn Jones, Interim Director of Workforce</p> <p>Assuring Committee: Gold Command COVID-19</p> <p>Date last reviewed: 10th May 2021</p>		
Controls (What are we currently doing about the risk?)	Mitigating actions (What more should we do?)		
<ul style="list-style-type: none">NWSSP capacity to support the mechanics has been increased but in the context of a significant increase in recruitment across Hywel Dda and SBU we have augmented support through using internal source to complete statutory checks. Bank have taken on a significantly expanded role running rolling recruitment for registered staff, HCSW and A&C. Interviews supported by staff from SGs. Other staff groups also need support but bank capacity itself has been exhausted. Bank have increased cover during the week and weekends, have deployed staff on site to support managers. Block booking of agency staff has been used when needed and we have and are continuing to explore off contract agency staff. SGs have been encouraged to accelerate their part in recruiting to substantive vacancies. Both TTP and Imms programme have groups just addressing recruitment. For A&C staff we are using the HB vocational training cell to identify staff from their programme complete training and PEC checks and liaise with local job centres to secure IT literate candidates for Imms booking centre staff and supervisors/managers. Every option to reduce workload and the back office administration linked to recruitment has been taken whilst ensuring the minimum required checks are in place.Improved attendance linked to reduced covid related absence impacting on fill rates and recruitment requirement remains at RED but 20.	Action Additional workforce are being recruited through national and local campaigns including the return of retired NHS professionals	Lead Assistant Director Workforce	Deadline Weekly ongoing
Assurances (How do we know if the things we are doing are having an impact?) <ul style="list-style-type: none">Executive monitoring/support to achieve improvement plans on a weekly basis.	Gaps in assurance (What additional assurances should we seek?) The need to deliver sustained service.		
Additional Comments Risk added after Gold meeting 13.11.20. Addition made by JRQ this week. Score is high because we are unable to meet the demands of the service. SV clarified that there is an issue is			

with testing and that some candidates are saying that a contract up until the end of March is too short. JRQ to pick this up with SV.

Discussion at Gold 23.11.20: DE to discuss with JRQ whether the score of this risk and those of risks 9a and b need to be made consistent. Await instructions

Discussion at Gold 30.11.20: Physical bed capacity available but the staffing resource is not available to open these beds. Risk increased given the workforce challenges. Operational silver working to mitigate the risk.

Discussion at Gold 11.12.20: No alteration to post-MA risk score required currently.

Discussion at Gold 21.12.20: No alteration to post-MA risk score required currently.

Discussion at Gold 7.1.21: No alteration to post-MA risk score required currently.

Discussion at Gold 24.1.21: No alteration to post-MA risk score required currently. The score reflects the position of staff returning, however, recruitment is still critical.

Discussion at Gold 1.2.21: No alteration to post-MA risk score required currently. The score reflects the remaining potential for issues with recruitment.

Discussion at Gold 08.02.21: No alteration to post-MA risk score required currently. KJ to review by 15.02.21

Additional Comments

Partnership principles and ways of working will be emphasised as the most effective approach to secure progress.

Discussion at Gold 21.08.20: Effects of recent activity to be monitored and score revised if subsequent change noted.

Discussion at Gold 18.09.20 & 22.10.20: No alteration to post-MA risk score required currently.

Discussion at Gold 29.10.20: No alteration to post-MA risk score required currently. No other major issues but nervousness remains around reducing this.

Discussion at Gold 06.11.20: No alteration to post-MA risk score required currently.

Discussion at Gold 13.11.20: No alteration to post-MA risk score required currently.

Discussion at gold 23.11.20 & 30.11.20: No alteration to post-MA risk score required currently. To be kept under review.

Discussion at Gold 11.12.20: No alteration to post-MA risk score required currently.

Discussion at Gold 21.12.20 Formal review required with a view to increasing to red 25.

Discussion at Gold 7.1.21: Risk score increased to 25 after further escalation of issues particularly PPE and the change to Imms policy and second dose.

Discussion at Gold 24.1.21: No alteration to post-MA risk score required currently. Risk score remains at 25 staff side still escalating issues particularly PPE and the change to Imms policy and second dose.

Discussion at Gold 1.2.21: No alteration to post-MA risk score required currently.

Discussion at Gold 08.02.21: No alteration to post-MA risk score required currently.

Discussion at Gold 15.02.21: No alteration to post-MA risk score required currently.

Discussion at Gold 22.02.21: No alteration to post-MA risk score required currently. This risk remains high following receipt of communications from TUs re annual leave carry-over.

Discussion at Gold 01.03.21: No alteration to post-MA risk score required currently. KJ to review by 08.03.21

Discussion at Gold 08.03.21: No alteration to post-MA risk score required currently. Issues continue to be raised in this arena, hence the requirement to maintain a high score.

Discussion at Gold 15.03.21: No alteration to post-MA risk score required currently. Issues continue to be raised in this arena, hence the requirement to maintain a high score.

Discussion at Gold 22.03.21: No alteration to post-MA risk score required currently.

Group discussed consistently high position of risk score leaving no room for further escalation should situations worsen. Noted that sufficiently robust mitigating actions required if the score is to remain this high. JRQ reluctant to support reduction of the score in light of recent difficulty in relations with TUs, who have been threatening instigating Ministerial action. JRQ to discuss this with KJ

Discussion at Gold 29.03.21: For review this week.

Discussion at Gold 12.04.21: No alteration to post-MA risk score required currently. KJ to review and see if downgrade to score of 20 is possible.

Discussion at Gold 20.04.21 JRQ noted that this risk should have been reduced to 20 and cannot be reduced any further currently due to a number of ongoing issues. Risk score reduced to reflect immediate impact only. Significant tensions remain. Access to all Wales support to help reduce concerns under consideration.

Discussion at Gold 26.04.21: Group agreed transfer to Corporate Risk Register for monitoring by the Workforce & OD Committee.

Additional Comments Discussion with WG planned over funding w/c 25.06.20 with potential for follow up letter - TBA at Chairs/Leaders/CEOs Call on 02.07.20. Amber 15 - appropriate at the moment. Still significant uncertainty. Discussion at Gold 28.08.20: No alteration to post-MA risk score required currently, however, increasing concern re ability to scale-up TPP operations in light of increased cases seen in Cardiff. Discussion at Gold 04.09.20: No alteration to post-MA risk score required currently. Remains under review; situation currently stable. Discussion at Gold 11.09.20: No alteration to post-MA risk score required currently. Discussion at Gold 18.09.20: For review in light of national concerns. Locally, the system is strained but continues to operate. 22.10.20 - Confirmed release of clinical leads within Health Board to support TTP. Capacity of TTP to deliver as required escalated nationally due to shortage of specialist health protection staff on a national level. Discussion at Gold 29.10.20: Director of Strategy is taking the risk to the TTP group for discussion and update on 10/11/20. This risk is likely to be higher than stated. Revision required. Discussion at Gold 06.11.20: SHG is taking this risk to the TTP group on 10.11.20 for review. Discussion at Gold 13.11.20: Recently reviewed. TTP Silver to consider again tomorrow. Discussion at Gold 23.11.20 & 30.11.20: Recently reviewed. TTP Silver to consider again today and report back on whether review required.			

Discussion at Gold 11.12.20: No alteration to post-MA risk score required currently.

Discussion at Gold 21.12.20: Position has increased to red in relation to SCG. Risk to be raised to red 20 provisionally ahead of formal confirmation following review by TTP Silver.

Discussion at Gold 7.1.21: Risk increased to red. Testing capacity saturated, but plans in place to increase capacity - additional capacity coming on line w/c 4th January. Tracing teams unable to cope with demand - fully staffed to funded levels, maximising redeployment of staff from LAs where possible. Mutual aid/support from the national team requested on several occasions. Testing turnaround times poor, especially from Public Health Wales lab at Singleton. Meeting held on 23/12 and performance improvements expected w/c 28/12 and 4/1.

Discussion at Gold 24.1.21: To be changed to Amber 15 in light of downgraded BRAG rating to 15.

Discussion at Gold 1.2.21: No alteration to post-MA risk score required currently. Potential for comment at today's TTP Programme Board.

Discussion at Gold 08.02.21: No alteration to post-MA risk score required currently. Group to be advised of any review required following TTP Silver Group Meeting.

Discussion at Gold 15.02.21: No alteration to post-MA risk score required currently.

Discussion at Gold 22.02.21: No alteration to post-MA risk score required currently. Group to be advised of any review required following TTP Silver Group meeting today.

Discussion at Gold 01.03.21: No alteration to post-MA risk score required currently. Group to be advised of potential to downgrade the risk following TTP silver Group meeting today.

Discussion at Gold 08.03.21: Reviewed this week and score to be retained as it stands, currently. Staffing remains a concern in this arena.

Discussion at Gold 15.03.21: Silver Meeting today – TTP risk has been downgraded to green. This is to be considered for alignment.

Discussion at Gold 22.03.21: No alteration to post-MA risk score required currently. Risk to remain open however as relates to ongoing issue.

Discussion at Gold 29.03.21: No alteration to post-MA risk score required currently.

Discussion at Gold 12.04.21: No alteration to post-MA risk score required currently.

Discussion at Gold 20.04.21: No alteration to post-MA risk score required currently.

Discussion at Gold 26.04.21: No alteration to post-MA risk score required currently. Risk to remain open given issues regarding duration of need and replacement.

Discussion at Gold 10.05.21: No alteration to post-MA risk score required currently. Risk to close and request TTP manage this risk within the TTP Cell

Discussion at Gold 17.05.21: Risk Update No alteration to post-MA risk score required currently. Risk to close and requested TTP to manage this risk within the TTP Cell. They are not meeting until 24th May 2021, therefore awaiting confirmation.

HB policy issued 13th July 2020 providing local guidance on managing for those staff who cannot find suitable child care options for the summer break. Initial estimates were numbers of staff affected were low. WG have confirmed that Schools will open fully in Sept so we are assuming this issue will cease from that date although we will keep the situation under review to address any issues with pre-school childcare. Very low levels of reported issues - guidance and flexibility seems to have been used sensibly by staff and managers.

	Short Term		
Risk: <u>Mass Vaccination</u> The Health Board is developing its forward plan which will aim to vaccinate a greater percentage of the population as part of the overall public health response. There are medium term risks around the allocation of sufficient vaccine to enable the programme to progress. In the medium term, there is an assumption that primary care will continue to be able to support the programme. Although many members of the workforce have been recruited on a fixed term basis, there are concerns about the stability of a core workforce. There is continued uncertainty about the policy direction and whether this will be adjusted by the Joint Committee on Vaccination and Immunisation and the nature of any proposed changes on the local programme. The public may not have faith in the local vaccine programme.	Director Lead: Keith Reid, Director of Public Health

Datix ID Number: 2491	R_COV_Strategic_016		
Risk: <u>Bed Spacing</u> Guidance was issued by WG in July setting out minimum requirements in respect of bed spacing between hospital beds. As a result of a detailed risk assessment carried out at Board level, the Board will not be able to fully comply with this guidance in respect of a minimum 3.6m mid to mid bed, and 3.7m between from bed head to middle of space across to opposite bed. This increases the potential risk of nosocomial transmission. If beds are withdrawn from use due to non-compliance with the minimum standards, then this introduces risk around the loss of capacity and potential for patient harm to be caused across the system due to flow issues.	Director Lead: Rab McEwan, Chief Operating Officer Assuring Committee: Gold Command COVID-19 Date last reviewed: 02 February 2021		
	CLOSED		
Controls (What are we currently doing about the risk?)	Mitigating actions (What more should we do?)		
<ul style="list-style-type: none">A detailed risk assessment has taken place and all inpatient areas have been reviewed for compliance with the guidance. A Red /Amber/Green rating has been deployed which means that Green = fully compliant; Amber - between 2m and 3.6m; Red = below 2metres. All Red bed areas have been removed. Mitigating action is being deployed and will be in place by end October.Perspex curtain installation is on track; 90% completed as at 5/11/20 and should be fully completed by 09/11/20 including in the Bay Field Hospital. A number of residual areas where there is currently high infection levels will be part of a 'mop up' installation plan that will be completed in November.	Action	Lead	Deadline
	TBC	Chief Operating Officer	Weekly ongoing

Assurances (How do we know if the things we are doing are having an impact?)	Gaps in assurance (What additional assurances should we seek?) .		
Additional Comments			
Discussion at Gold 22.10.20 – risk added to register. Discussion at Gold 06.11.20: No alteration to post-MA risk score required currently. Reflects current concern re outbreaks. Discussion at Gold 13.11.20: Higher score required. Although the position has stabilised in some areas there are still outbreaks in new areas. For review at Nosocomial Group this week due to operational problems caused. Discussion at Gold 23.11.20: No alteration to post-MA risk score required currently. DE increased this score to reflect recent nosocomial deaths and infections, however, this could be decreased as the underlying risk abates. Discussion at Gold: Nosocomial group to review and make recommendation if this risk can be reduced to 20. Discussion at Gold 21.12.20: For review at Nosocomial Group on 22.12.20. Discussion at Gold Command 7.1.21: No alteration to post-MA risk score required currently. Discussion at Gold Command 24.1.21: Update provided for inclusion in log. Update given 25.01.21: 1. A Nosocomial Transmission Silver group has been established. A nosocomial framework has been developed to focus on (a) prevention and (b) response. Preventative measures are in place including testing on admission, segregating positive, suspected and negative patients, reinforcing PPE requirements, and a focus on behaviours relating to physical distancing. Audit tools developed to support consistency checking in key areas re: PPE, physical distancing. Testing on admission dashboard in use across all SDU's. 2. An outbreak control team has been established to manage the outbreaks across the Health Board. As part of the response, measures have been enacted to oversee the management of outbreaks and will report to the Nosocomial Transmission group for assurance. 3. Processes have been established to review nosocomial deaths and to share lessons learned across the Health Board			

Discussion at Gold 1.2.21: Score to be reduced to 20 following discussion at Nosocomial Group.

Discussion at Gold 08.02.21: No alteration to post-MA risk score required currently. Request review by the Nosocomial Group with a view to reducing the risk score.

Discussion at Gold 15.02.21: No alteration to post-MA risk score required currently. CW to review with the Nosocomial Group later this week. Recent deteriorations in position at Morriston and Singleton, although slight, may impact previous intention to reduce the score.

Discussion at Gold 22.02.21: No alteration to post-MA risk score required currently.

To mitigate risks further, the Nosocomial Transmission Silver group has agreed an enhanced inpatient screening protocol within the emergency inpatient pathway, to include in addition to testing on day of admission, testing on Days 3 and 5 to identify clinically unrecognised positive patients sooner and ensure appropriate placement of positive patients in COVID wards. In addition, an inter-hospital screening protocol has been developed and is to be ratified by COVID Gold.

Mitigations have been reviewed this week, and although there has been an increase in protocols to be implemented, these have not yet embedded meaning that the score has not yet reduced. This reflects the current volatility of the situation.

Discussion at Gold 01.03.21: No alteration to post-MA risk score required currently. DE to consider potential to downgrade risk.

Discussion at Gold 08.03.21: No alteration to post-MA risk score required currently. Given remaining outbreak areas, there is no requirement for the post-MA risk score to be reviewed, currently. Although the number of outbreak areas is declining, COVID patients are still arriving at sites from the community and it remains a case of admitting at risk to Singleton and Morriston.

Discussion at Gold 15.03.21: No alteration to post-MA risk score required currently. On review is there scope to downgrade in light of an improved position. Reported RE thinks same number of outbreaks reported to remain at this level.

Discussion at Gold 22.03.21: No alteration to post-MA risk score required currently. Risk is still present.

Discussion at Gold 29.03.21: No alteration to post-MA risk score required currently.

Discussion at Gold 12.04.21: No alteration to post-MA risk score required currently. PSD and CW to review narrative

Discussion at Gold 20.04.21: No alteration to post-MA risk score required currently. Risk has been considered over the last week and the risk score is to remain at 20 as a reflection of the, still, volatile situation and continued potential for escalation. Standing issues relate to staff and visitor testing, sustainable use of appropriate PPE and a slight delay to nosocomial reviews recently. PSD is to update narrative with a view to reducing the score if matters settle in the next 7-10 days.

Discussion at Gold 26.04.21: No alteration to post-MA risk score required currently. Suggestion to manage via Quality & Safety Committee declined. Agreed to retain FAO of Gold given attention required on managing acute flow. This will not be addressed if managed by background IPC processes. The situation can change quickly. The risk has been reviewed this week and will be reconsidered in a fortnight.

Discussion at Gold 10.05.21: No alteration to post-MA risk score required currently. Improvements made in control measures, to review at the end of the week by Nosocomial Group.

Discussion at Gold 17.05.21: Reviewed and updated in the log. Risk reduced to 16. Request by Pam Wenger for this risk to remain on C-19 risk register but also to be included as a risk on the Corporate risk register- SCORE REDUCED FROM 20 TO 16

Discussion at Gold 26.05.21: No alteration to post-MA risk score required

Discussion at Gold 7.1.21: No alteration to post-MA risk score required currently. Discussion at Gold 24.1.21: No alteration to post-MA risk score required currently. Work ongoing. Discussion at Gold 1.2.21: No alteration to post-MA risk score required currently. Conversations are ongoing re potential risk of whole-service closure. Discussion at Gold 08.02.21: No alteration to post-MA risk score required currently. Discussion at Gold 15.02.21: No alteration to post-MA risk score required currently. GC, MC and KJ held a meeting and agreed a set of principles for this. Work is underway to document them prior to consideration of the risk score. Discussion at Gold 22.02.21: No alteration to post-MA risk score required currently. Discussion at Gold 01.03.21: No alteration to post-MA risk score required currently. Discussion at Gold 08.03.21: No alteration to post-MA risk score required currently. Discussion at Gold 15.03.21: No alteration to post-MA risk score required currently. Discussion at Gold 22.03.21: No alteration to post-MA risk score required currently. KJ met with colleagues to produce a procedure which would enable redistribution of services in the event of Morrison being affected to the point of closure. JW stated that this is general, emergency planning which should be in place as a matter of course. Discussion at Gold 29.03.21: No alteration to post-MA risk score required currently. Discussion at Gold 12.04.2021: No alteration to post-MA risk score required currently. Deb Lewis and JW to consider review of score. This is now less related to COVID as the immediate risk has stabilized, however, a long term plan is required.			

Discussion at Gold 20.04.21: No alteration to post-MA risk score required currently: Procedure being developed. This is complex. The risk was agreed to be more of a general business risk, rather than a COVID-specific one. Consideration to be made of whether this can be moved to the Service Group risk register and/or the corporate risk register.

Discussion at Gold 26.04.21: No alteration to post-MA risk score required currently: Group agreed transfer of this risk to the Corporate Risk Register. Although the matter rose from COVID, it now relates to a more generic risk for pick-up at Health Board level. Agreement required re how this will be managed and by whom.

Discussion at Gold 10.05.21: CLOSED and to transfer to Corporate Risk Register for monitoring by Chief Operating Officer. To follow up with RM regarding some outstanding information for the risk register.

Risk added 11 December 2020 Discussion at Gold 21.12.20: No alteration to post-MA risk score required currently. Discussion at Gold 7.1.21: No alteration to post-MA risk score required currently. Discussion at Gold 24.1.21: No alteration to post-MA risk score required currently. Discussion at Gold 1.2.21: No alteration to post-MA risk score required currently. Current scores reflect the situation in other parts of the sector. Discussion at Gold 08.02.21: No alteration to post-MA risk score required currently. Current scores reflect discussion at Field Hospital Establishment Group last week. Discussion at Gold 15.02.21: No alteration to post-MA risk score required currently. Discussion at Gold 22.02.21: No alteration to post-MA risk score required currently. (Pending activation) Discussion at Gold 01.03.21: No alteration to post-MA risk score required currently with the field hospital unlikely to require activation imminently. Discussion at Gold 08.03.21: No alteration to post-MA risk score required. BO to consider review of this, however, as although there is still a risk re using field hospitals, the low likelihood of that happening at present may allow for the risk score to be reduced. Discussion at Gold 15.03.21: No alteration to post-MA risk score required. smaller scale soft opening – Red 20 – change in likelihood of the requirement to use this - To be kept under review Discussion at Gold 22.03.21: No alteration to post-MA risk score required. For consideration by Field Hospital Establishment Group as mitigating actions are outdated. Discussion at Gold 29.03.21: No alteration to post-MA risk score required currently. On agenda for consideration at this week's Field Hospital Establishment Group. Subsequent report-back to be received. Discussion at Gold 12.04.2021: No alteration to post-MA risk score required currently. For review by the Field Hospital Establishment Group this week. Discussion at Gold 20.04.2021: Risk to be closed on the basis that the need for the soft launch test is no longer a requirement at this stage of impact of the pandemic. Should we see a ramp up of prevalence or pressure on the system that suggests a ramp up to possible field hospital utilisation we would resurrect the action and reflect on the risk then. Discussion at Gold 26.04.2021			
Current Risk Rating 5 x 4 = 20			

Initial Risk	25	
Current	20	
Target	15	

Datix ID Number: 2569		R_COV_Strategic_020		
Risk: Workforce Resilience (added 16/12/20) Culmination of the pressure and impact on staff wellbeing - both physical and mental relating to Covid Pandemic. Local prevalence of Covid infections increasing positive testing and the debilitating effect of the second wave impacting staff. Impact direct in terms of covid / related sickness (symptomatic Absence) and self-isolation (Asymptomatic). Increased staff absence impact on the pressures for those still in work.		Director Lead: Chris White, Chief Operating Officer (COO) Assuring Committee: Gold Command COVID-19 Date last reviewed: 26 TH April 2021 Transferred to Health Board Risk Register		
Controls (What are we currently doing about the risk?)		Mitigating actions (What more should we do?)		
Additional Wellbeing support facilitated by limited L&D Coaches and Wellbeing team. – the model developed aims to increase awareness of the staff wellbeing service and National support offer a 'listening ear' approach with interventions to support and increase resilience of line-managers. Commitment from Nurse Directors and MGH Matron's to increase line-manager presence physically rather than virtually on wards and to utilise staff unable to work on wards to deliver, 'Taking Care Giving Care' rounds to colleagues. Occupational Health open over the bank holidays to support staff testing, urgent advice giving and contact tracing.		Action	Lead	Deadline
		Additional Wellbeing support facilitated by limited L&D Coaches and Wellbeing team.	Director of Workforce	Weekly monitoring
		Occupational Health open over the bank holidays to support staff testing, urgent advice giving and contact tracing.	Director of Workforce	Daily monitoring
Assurances (How do we know if the things we are doing are having an impact?)		Gaps in assurance (What additional assurances should we seek?)		
Current Risk Rating 5 x 5 = 25				
Initial Risk	25

Target	10			

Risk Score Calculation

For each risk identified, the LIKELIHOOD & CONSEQUENCE mechanism will be utilised. Essentially this examines each of the risks and attempts to assess the likelihood of the event occurring (PROBABILITY) and the effect it could have on the Health Board (IMPACT). This process ensures that the Health Board will be focusing on those risks which require immediate attention rather than spending time on areas which are, relatively, a lower priority.

Risk Matrix	LIKELIHOOD (*)				
	1 - Rare	2 - Unlikely	3 - Possible	4 - Probable	5 - Expected
CONSEQUENCE (**)					
1 - Negligible	1	2	3	4	5
2 - Minor	2	4	6	8	10
3 - Moderate	3	6	9	12	15
4 - Major	4	8	12	16	20
5 - Catastrophic	5	10	15	20	25
