Pre-Action Disclosure Applications (PADAs) /Breach of Protocol

For clarification, the 'complied with protocol' section of the file review refers to whether we have complied with the protocol in **this** 6 month period. If, therefore, a liability decision has been provided it is determined that the Health Board **has** complied with the protocol even if the decision was not actually reached within the timescale provided by the protocol period i.e. 3 months.

If the Health Board has not provided a liability decision the file review will say that it has **not** complied with the protocol. There may be a number of reasons for this – it may be that the relevant documentation has not yet been provided, it may be that all the documentation has been provided but liability simply can't be determined or the liability position may be being kept open for tactical reasons. If you are at all concerned about the reasons as to why there may have been non compliance with the protocol do feel free to contact the file handler who will, of course, be happy to discuss any concerns you may have.
