People Strategy 2024-2029

Contents

01

Why have we developed this strategy?

02

What is our starting position?

03

Glossary

Our seven strategic aims

Theme 01:
**Engaged, Motivated
and Healthy**

We want our people to feel valued,
fairly rewarded and supported

Theme 05:
**Excellent Learning
and Education**

We will support our people to develop
the skills and capabilities they need

Theme 02:
**Attract
and Recruit**

We want to be recognised as an
employer of choice

Theme 06:
**Leaders That
Live Our Values**

We want all our people to role model
collective and compassionate leadership

Theme 03:
**Well
Planned**

We will aim to have the right number of
skilled people working on the right things

Theme 07:
**Equality, Diversity
and Belonging**

We will strive to be diverse and inclusive,
ensuring all voices are heard

Theme 04:
Digitally Ready

We want to ensure our people
feel ready for our digital future

How will we deliver this strategy together?

Through our new People Promise, our new Partnership Compact with our Trade Union Partners and our existing values:

Caring for each other:

in every human contact in all our communities and each of our hospitals.

Working together:

as patients, families, carers, staff and communities so that we always put patients first.

Always Improving

so that we are at our best for every patient and for each other.

01

Why have we developed this strategy?

Introduction

“Welcome to our five year People Strategy. It is a strategy that reflects and addresses what you told us during Our Big Conversation.

It has been written in collaboration with a broad range of partners and it aligns with our new, ten year Health Board vision to become a high quality organisation. That vision sees us put our patients and service users at the heart of everything we do.

You, our people, are pivotal to delivering our ambitious vision and this People Strategy enables us to collectively focus on what is important to you, creating an environment where you feel empowered and able to flourish.

We want to thank you for everything you are doing to make Swansea Bay University Health Board a great place to work and receive high quality care.”

Richard Evans
Interim CEO

Debbie Eytayo
Executive Director of Workforce and OD

Gary John
Chair of Staff Side

Nigel Hill
Vice Chair of Staff Side

Why have we developed this strategy?

Our people are important to us

We employ almost 14,000 people and are supported by over 300 volunteers. We want to ensure we provide you with a great experience of our Health Board by promoting equality, diversity and belonging in everything we do. We also want to ensure you are skilled, motivated and passionate about delivering high quality care to the communities we serve.

Our communities are important to us

Our people strategy aligns to our ten year vision to become a high quality organisation and our ambition to become a leading healthcare provider for our communities. We are also committed to our ambition to be a great employer for our communities by widening access to healthcare roles and strengthening fair working practices.

Our environment is changing

Our strategy is also aligned to national workforce strategies which recognise that we are facing challenges and changes ahead. We need to ensure we equip and support you to meet these challenges both now and in the future.

We need to work together to deliver a great experience for our people

Every one of us is responsible for providing our people, which includes our volunteers, with a great experience of our Health Board. Communicating a shared vision and a set of high level actions is the first part of our journey to enable us to achieve this vision together. These actions will be reviewed annually to ensure they remain relevant and are aligned to our Health Board priorities.

02

**What is
our starting
position?**

Engaged, Motivated and Healthy:

Our Big Conversation engagement programme took place in October 2022 and provided us with rich feedback from over 1,400 of our people. This feedback has been used to inform the actions within our new 10 year One Bay Way vision document and the actions within this people strategy. As we begin to deliver this strategy, we will be measuring for improvements in engagement levels by, for example, reviewing the feedback from the 2023 NHS Wales staff Survey. We would also expect to see a reduction in our 12 month leaver rate (10.4% as of August 2023) and our sickness absence rate (6.78% for the month of July 2023).

Attract and Recruit:

We are committed to promoting our career opportunities within the Health Board. From April 2023 - Oct 2023, we held 12 events attended by approximately 1000 people from schools, colleges and ethnic minority groups. We also launched our new attraction branding and bilingual recruitment website in 2023 to increase interest in Swansea Bay as an employer of choice. In 2022/23 the Health Board (HB) introduced a Central Resourcing Team (CRT) to support Nursing and Health Care Support Worker recruitment. The additional support saw recruitment timelines reduce from 78.7 working days (HB average) to 50.5 working days (CRT average) and an improvement in candidate experience (e.g. in March 2022, there was a 100% communication score with CRT support, compared to 35% without).

Well Planned:

As of August 2023, our Health Board vacancy rate was reported as c.10%. However this figure only provides a snapshot in time and does not take into account live recruitment. The CRT and the Medical Recruitment Team's continued efforts to fill vacancies has started to see our expenditure on temporary people (e.g. agency staff) reduce, with a predicted reduction of £10m for this financial year. However more planning is needed to ensure we have sustainable sources of skilled people through, for example, our annual education commissioning process, and that our people are working on the right things.

Digitally Ready:

We are currently working with Health Education Improvement Wales to promote a new digital readiness self-assessment tool, which will provide the Health Board with anonymised data on what our people need to become digitally ready. However as of March 2023, our response rate as a Health Board was very low and therefore we need to do more to promote this tool so we can review the digital needs of our people and introduce different supportive initiatives.

Excellent Learning and Education:

As of September 2023, our Health Board is meeting our target for 85% of our people to have completed all 14 core competencies via statutory and mandatory training modules (86.2%), however there is still variation across different staff groups, which needs to be improved.

Leaders that live our values:

We currently have a number of leadership development programmes available to support our people, which were attended by over 1,000 leaders between April 2022 and March 2023. However, feedback from Our Big Conversation engagement programme in October 2022 suggested that leadership behaviours was one of the areas that our people still felt needed improving so we recognise we have more work to do to support our leaders to embed the learning from these programmes into their everyday roles and that our people are working on the right things.

Equality, Diversity and Belonging:

We currently have staff networks in place to support our people. For example, the aim of our BAME staff network is to celebrate ethnic and cultural diversity and the aim of our Calon network is to promote an inclusive and equitable place for all, irrespective of sexuality or gender identity. However our people data needs improving. As of March 2022, data was missing for almost a third of our people for some protected characteristics (e.g. 19% missing data on ethnicity, 27% for religion and 28% for sexual orientation).

Theme 01

Engaged, Motivated and Healthy

We want our people to feel valued, fairly rewarded and supported

Why are we focusing on this?

We know that a great experience of work and high levels of wellbeing, results in great patient and service user experience. We want our people to feel proud of the care we provide, feel valued, recognised and fairly rewarded for their contribution and to feel connected to the Health Board and the teams they work within.

Note the feedback we received from our 2022 Big Conversation engagement programme has helped to inform the actions within this strategy.

How will we achieve this?

We will:

- deliver the recommendations from our Big Conversation engagement programme, through our new People Promise and compact with our Trade Union Partners
- develop and deliver actions which will support us to retain our people, such as reviewing our flexible working practices
- deliver a people recognition programme so every person feels valued
- focus on the wellbeing of our people with timely access to Occupational Health and Wellbeing support, providing relevant training and information and extending our wellbeing champions network
- continue to listen to our people and take action when they speak up
- embed a positive volunteering culture and inspire more to participate
- review our people (HR) processes to align with best practice and a learning culture

How will we measure our progress?

We will review our attendance, leaver rates and responses from engagement surveys and exit interviews and we will review how we implement our people (HR) policies to ensure we are placing our people at the centre.

Theme 02

Attract and Recruit

We want to be recognised as an employer of choice

Why are we focusing on this?

We need to ensure we can attract and recruit the right people, with the right skills, at the right time, to meet the healthcare needs of our communities. We are committed to supporting our communities by widening access to healthcare careers and facilitating local recruitment.

In addition, our ambition is to become an employer of choice in a competitive national and international market.

How will we achieve this?

We will:

- widen access to healthcare careers by increasing our work experience, apprenticeship, graduate and clinical observation opportunities, particularly from underrepresented groups
- introduce Gateway Academy Programmes to develop career pathways for hard to fill roles
- continue to promote our Health Board as a great place to work/ volunteer
- provide resourcing support to services to recruit to their medical and clinical people gaps
- continue to ethically recruit some of our nursing and medical people internationally, expanding to other professions where appropriate
- improve the recruitment experience of our candidates, for example, by increasing our training offer for recruiting managers

How will we measure our progress?

We will measure the number of career opportunities we offer to our communities, how many we fill and the impact this has on our diversity profile. We will also review the time it takes to recruit our people, our candidates' experience and our vacancy rates.

Theme 03

Well Planned

We will aim to have the right number of skilled people working on the right things

Why are we focusing on this?

We cannot deliver our services without our people. Planning and delivering co-ordinated healthcare services with appropriately skilled people, is essential to improving outcomes for our patients and service users.

Therefore we will need to build our capability in planning our people and identifying innovative solutions, sometimes with the help of our partners, to overcome our people challenges. We will also need to embrace new ways of working by placing our teams around our patients and service users.

How will we achieve this?

We will:

- improve skills in workforce planning and use of people data
- identify the people we need and how we will design, develop and deliver them to address any immediate or emerging people risks/gaps
- develop great teams, in less hierarchical structures and across multi-disciplinary boundaries, focussing on patient/service user outcomes
- work with our regional partners to support collaborative workforce planning across systems
- continue to review and update our people systems to improve the accuracy of our people data
- review our people (HR) practices so they facilitate change
- design our workforce and roles to support the decarbonisation/ climate change agenda

How will we measure our progress?

We will measure our vacancies; impact on quality and how much money we spend on temporary people to fill gaps. We will review our people (HR) practices to ensure they are timely and achieving their desired outcomes.

Theme 04

Digitally Ready

We want to ensure our people feel ready for our digital future

Why are we focusing on this?

It is important we develop our people to feel confident using digital tools, systems and technology to help improve access to our services, support us to work more efficiently, provide more effective treatments and provide better services for our patients and service users overall.

However we recognise that for some of our people, this is scary, so we all need to play a role in supporting and building confidence to embrace our digital future.

How will we achieve this?

We will:

- encourage our people to complete the national digital readiness self-assessment to help us understand what our people need, implementing supportive action where required
- develop more robust plans when integrating new digital solutions to ensure the impact on our people has been fully considered, including any cultural change required to embed them
- develop guidance on how our people can look after their wellbeing while using digital tools and technologies
- expand our Office 365 Digital Champions Network to provide more digital support
- provide training for digital and data solutions, working with our Trade Union partners to source funding where required
- keep horizon scanning for new or enhanced technologies

How will we measure our progress?

We will review feedback from our people on what they need, on our training events and the impact of new digital solutions, where possible. We will also keep an eye on our people wellbeing metrics, including responses to engagement surveys.

Theme 05

Excellent Learning and Education

We will strive to develop the skills and capabilities our people need

Why are we focusing on this?

Research confirms that investing in our people's development has a key role to play in engagement and wellbeing, as well as recruitment and retention.

In addition, enhancing certain skills, such as use of the Welsh language, is linked to improved patient and service user experience and higher quality healthcare.

How will we achieve this?

We will:

- improve learning opportunities for our people, especially within their first 12 months of employment e.g. through buddying arrangements
- improve awareness of Welsh Government initiatives that increase professional skills and boost careers, including apprenticeships
- introduce pilot schemes for our people to learn and use Welsh
- continue to promote learning via statutory and mandatory training
- review and evaluate the content of our education and learning programmes to ensure they meet our people's needs and remain aligned to our vision
- ensure we work effectively with Health Education and Improvement Wales, Swansea University and other education partners to plan and deliver our educational requirements
- transform our coaching and mentoring opportunities to increase accessibility for all our people
- develop our education strategy

How will we measure our progress?

We will review access as well as numbers of staff completing training and their evaluation feedback. We will also evaluate the effectiveness of our coaching and mentoring initiatives.

Theme 06

Leaders that Live our Values

We want all our people to role model collective and compassionate leadership

Why are we focusing on this?

It is well documented that leadership has the biggest impact on a team's culture and performance. This was also highlighted as an area requiring improvement from 'Our Big Conversation' feedback.

Our leadership philosophy is based on building great multidisciplinary teams with a common vision, empowered to deliver high quality care for our patients and service users.

How will we achieve this?

We will:

- review and refresh our existing leadership development programmes to include collective and compassionate leadership principles
- design a suite of new leadership development initiatives for all levels of clinical and non-clinical leaders that supports us to embed our values, behaviours and deliver our One Bay Way 10 year vision
- continue our Talent Management and Succession planning work and expand it to align with our appraisal processes
- develop a people SharePoint site for our people to access and engage with our people (HR) policies and processes, as well as innovative best practice standards

How will we measure our progress?

We will measure access and numbers of staff on our leadership programmes and review evaluation feedback. We will review feedback relating to leadership, management and appraisals from surveys. We will also review data from our people (HR) processes and from concerns raised through our speaking up safely processes.

Theme 07

Equality, Diversity and Belonging

We will strive to be diverse and inclusive, ensuring all voices are heard

Why are we focusing on this?

We want to promote a compassionate culture that is inclusive and equitable, thrives on diversity and one which actively addresses inequalities. We also recognise from Our Big Conversation that a sense of belonging is important to our people.

We need to meet our legal responsibilities outlined in the Welsh Language Standards (enabling us to provide service user/patient centred care) and also the Equality Act 2010. We also have objectives to meet, such as those in the Anti-Racist Wales Action Plan and the Workforce Race Equality Standards (WRES).

How will we achieve this?

We will:

- improve the quality of our people data in order to develop intelligence to create inclusive work environments and release the benefits of diversity for our people
- to further support a sense of belonging, develop and expand the existing cultural conversations to other staff groups, including identifying and supporting Cultural Ambassadors
- develop and deliver cultural competency awareness sessions
- review recruitment practices to eliminate bias and address barriers
- champion diversity and belonging by raising awareness of support available (e.g. staff networks) for our people who may have one or more protected characteristics (e.g. relating to age, ethnicity, sexual orientation etc.)
- continue to listen to our people and take action when they speak up

How will we measure our progress?

We will review our people engagement scores against protected characteristics, our people data, and work with our staff networks to monitor the impact of our EDB initiatives.

03

Glossary

**Apprenticeships:**

these combine practical training in a job with study

Belonging:

when we feel happy or comfortable because we welcome and accept each other

Champions:

our people who let colleagues know about services/relevant events

Collective leadership:

when we all take responsibility, not just for our own jobs, but for the success of our team and our Health Board as a whole

Compact:

a signed written agreement that binds you to do what you have promised

Compassionate leadership:

creates an environment where there is no bullying, and where learning and quality improvement are part of our daily jobs

Cultural ambassadors:

our people who represent or promote different cultures

Cultural competence:

our will and actions to build understanding of different cultural perspectives and to strengthen cultural security and equality of opportunity

Cultural conversations:

supportive discussions with our people regarding cultural differences

Diversity:

refers to recognising, respecting and valuing the differences in our people

Employer of choice:

when our culture, leadership style and people engagement initiatives are desirable to our potential and existing people

Engaged:

when we feel enthusiastic and dedicated to our roles

Equality:

providing equal opportunities and protecting our people from being discriminated against

Ethical recruitment:

hiring workers lawfully, in a fair and transparent manner that respects and protects their rights

**Fairly rewarded:**

when we feel appropriately recognised for the work we have done

High quality:

timely, effective, efficient, safe, equitable and person centred

Horizon scanning:

detecting early signs of potentially important developments

Inclusion:

the extent to which we feel valued and included

Innovation:

a new or improved solution

Multi-disciplinary:

people from different disciplines who come together to achieve a common goal

Partners:

different organisations working together to achieve a common goal

Protected Characteristics:

Age, Disability, Gender Re-assignment, Marriage and civil partnership, Pregnancy and Maternity, Race, Religion or belief, Sex and Sexual orientation

Retention initiatives:

how we keep/ retain our people

Staff networks:

a safe space for our people who share one or more protected characteristics

Strategy:

a plan of action designed to achieve a long-term or overarching aim

Succession planning:

a process for identifying our critical positions and developing action plans for how we will fill those positions

Underrepresented groups:

this can include (but is not limited to) people from diverse ethnic backgrounds, the LGBTQIA+ community and those with other protected characteristics

Valued:

when we feel important and that we have done a good job

Wellbeing:

refers to our mental, emotional and physical health and a healthy lifestyle

**Swansea Bay
University Health Board
Our People Promise**

What I can expect from the Health Board

A voice that counts:

feeling safe and confident to speak up. We will listen, act and respond.

Compassion, inclusivity and belonging:

we will not tolerate any form of discrimination, bullying or violence.

Leadership that role models:

and acts as advocates for our Health Board values and behaviours.

Every role feeling valued for their contribution:

we will recognise and reward excellent performance and share a simple 'thank you' for day to day delivery of services and care.

Trust, autonomy and efficiency:

we will streamline key processes and systems that do not add value, create waste, delay and cause potential harm.

Flexibility:

we will not sacrifice our health, safety and wellbeing. We will support flexible work patterns wherever we can and if we do need to take time off, we are supported to do so.

Always learning and support to reach our potential:

we have equal access to opportunities. We attract, develop and retain talented people.

Creation of purpose and direction:

to enable everyone to understand the principles, changes and intent we have to improve services.

Working for our patients to deliver outstanding care:

and out the patient before the NHS and other organisational barriers and transcend this by working in partnerships.

What the Health Board expects from me

A voice that counts:

feeling safe and confident to speak up. We will listen, act and respond.

Taking ownership and responsibility:

holding myself and others to account for delivery of high quality, patient/service user-centred care, with clear delivery focused goals and always aspiring to make things better.

Speaking up and raising concerns respectfully:

where we notice anything that will compromise staff or patient safety or quality.

Working as a team across the system for our patients:

providing a seamless patient /service user journey and reducing barriers to access for all.

Decision making:

by those closest to patients/service users in partnership with and supported by managers.

Kind, compassionate care and service delivery:

in my daily interactions with patients, families, carers and colleagues, in line with our values, including being kind enough to have the tough conversations and to do these with compassion.

Deliver evidence based harm free care :

based on understanding key risks, in line with clear clinical outcomes that reflect the hallmarks of service quality.

Work inclusively with all colleagues:

and value difference, building a more inclusive place for our staff and patients.

Work together across multi-disciplinary teams:

to set a vision, strategy and plan for your services to everyone is clear where you and your service is heading and how it supports the services patients receive.

Our partnership compact

The following set of principles have been agreed with our Partnership Forum and describe how we will work together to deliver this strategy:

Person Centred: We will ensure we put people at the centre of what we do

Equitable: We will work together on informal resolution where possible and appropriate

Timely: We will strive to make ourselves available to get things done in a timely manner to avoid employee harm

Safe: We role model and reflect our values in everything we do

Efficient: We will be champions of the process

Effective: We recognise our different roles and seek to better understand this together
