Meeting Date	**30 January 2020**	**Agenda Item**	**4.4**
Report Title	**Board Assurance Framework (BAF)**		
Report Author	Jacqui Maunder, Interim Head of Compliance		
Report Sponsor	Pam Wenger, Director of Corporate Governance		
Presented by	Pam Wenger, Director of Corporate Governance		
Freedom of Information	Open		
Purpose of the Report	The purpose of this report is to provide the Health Board with an update on the work to review and update the Health Board's Board Assurance Framework (BAF) document.		
Key Issues	• The development of the Board Assurance Framework (BAF) has been agreed by the Board and is owned by the Accountable Officer and the Board, • The Director of Corporate Governance is the lead Executive with responsibility for the delivery of the BAF, • The Audit Committee has a key role in overseeing the development of the BAF, and • Meetings have been held with the relevant Executive Directors and managerial leads (e.g. Nursing, Health & safety) to discuss content and obtain updated information to populate the BAF. • The Executive team reviewed the updated BAF at its meeting 13 November 2019. • The Audit Committee endorsed the updated BAF at its meeting 21 November 2019 recognising the document will continually evolve. • The BAF will be monitored by the Risk Management Group in tandem with the Health Board Risk Register (HBRR).		
Specific Action Required ***(please choose one only)***	**Information**	**Discussion**	**Assurance**	**Approval**
	☐	☐	☒	☐
Recommendations	Members are asked to: • **NOTE** the progress on the development of the Board Assurance Framework (BAF), acknowledging that it is a work in progress and will be continually updated			

BOARD ASSURANCE FRAMEWORK (BAF)

1. INTRODUCTION

The purpose of this report is to provide the Health Board with an update on the work to review and update the Health Board's Board Assurance Framework (BAF) document.

2. BACKGROUND

It is essential that there is an effective and efficient framework in place to give sufficient, continuous and reliable assurance on organisational stewardship and the management of the major risks to organisational success and delivery of improved, cost effective, public services. Understanding the sources of assurance and their scope means internal audit can focus most effectively on the riskier areas. The structured mapping of assurances is one of the fundamental steps in building an assurance framework.

An effective assurance framework:

- Provides timely and reliable information on the effectiveness of the management of major strategic risks and significant control issues

- Facilitates escalation of risk and control issues requiring visibility and attention by senior management, by providing a cohesive and comprehensive view of assurance across the risk environment

- Provides an opportunity to identify gaps in assurance needs that are vital to the organisation, and to plug them (including using internal audit) in a timely, efficient and effective manner

- Can be used to raise organisational understanding of its risk profile, and strengthen accountability and clarity of ownership of controls and assurance thereon, avoiding duplication or overlap

- Provides critical supporting evidence for the production of the Governance Statement

- Can clarify, rationalise and consolidate multiple assurance inputs, providing greater oversight of assurance activities for the Board/Audit & Risk Assurance Committee in line with the risk appetite; and

- Facilitates better use of assurance skills and resources.

The original Board Assurance Framework was developed following discussion within the Board and guidance outlined within the Good Governance Guide for NHS Wales Boards (2014), Academi Wales; and the joint BAF workshop held with NHS Wales Audit Committee Chairs, the Wales Audit Office (WAO) and the NHS Wales Board Secretaries network in January 2018.

In 2018 the Director of Corporate Governance undertook a governance stocktake and areas of focus for 2018-19 were captured within a Governance Work Programme for 2018-19. The Audit Committee endorsed an agreed template for the BAF in 2018, however, due to the challenges in terms of the risk management system and process, the Audit Committee agreed to pause the development of the BAF whilst work progressed on the risk management process to develop an updated Health Board Risk Register (HBRR). The new HBRR was approved by the Audit Committee in early 2019.

Since then work has been undertaken to develop the BAF influenced through feedback from the Audit Committee and internal audit. The revised document reflects good practice, is evidence led through business intelligence and feedback from the Executive Team and reflects the actions required from the internal audit feedback on the BAF.

The updated BAF has been compiled to take account of the good practice identified in the Care Quality Commission's (CQCs) Quality report for the University Hospitals Bristol NHS Foundation Trust[1] which stated that the Board Assurance Framework in place provided clear alignment between strategic priorities and risks within the organisation, and clear evidence of ward to board, to ward feedback loops and escalation with a strong basis in the governance systems in place within the trust.

The revised SBUHB BAF outlines the health board risks and a summary of focus areas for internal audit and external inspection has been further developed to provide additional assurance.

2.1 Developing the BAF

The Board Assurance Framework has been developed in partnership with the Executive Directors and their teams and has been updated to map risks from the Health Board Risk Register (HBRR) to the specific enabling objectives. In addition, unit risks emanating from the Service Delivery Units (SDU's) have also been mapped to each enabling objective to provide a ward to board view of operational risks. There is further work to do on reviewing and finalising the list of operational risks, and the next update of the Board Assurance Framework will include the operational risks once validated by the Units which will include the operational risks which could have an impact on the delivery of the agreed corporate objectives.

The work undertaken to strengthen and develop the BAF includes:

- Updated to reflect feedback from the Audit Committee and Internal audit recommendations to include unit risks, assurance ratings etc
- Mapping of SBUHB's enabling objectives, and one associated primary risk allocated per objective instead of several
- Cross referenced with the updated Health Board Risk Register, November 2019
- Cross referenced with the internal audit progress update – Audit Committee September 2019
- Reference to external inspection reports have been added (where known)
- Cross referenced with the Annual Plan 2019-2020 and Clinical Services Plan
- Cross referenced with the Annual Plan quarterly returns to the Performance & Finance Committee – Q1 & Q2
- The adequacy of assessment barometer indicator has been given based on a number of different factors, including level of risk, level of assurance etc
- Meetings have been held with the relevant Executive Directors and communication with managerial leads (e.g. Nursing, Health & safety etc) in September & October 2019 to discuss content and obtain updated information

[1] https://www.cqc.org.uk/sites/default/files/new_reports/AAAG3535.pdf

2.3 Operationalising the use of the Board Assurance Framework

The Audit Committee endorsed the BAF for ongoing use within SBUHB in November 2019 recognising that it is a developing document. The BAF will be taken forward as set our below:

- The Health Board risks and unit risks will be validated to ensure a full and accurate map across to strategic and frontline operational risks, in discussion with the Head of Patient Experience, Risk & Legal Services
- Individual Directors will be asked to provide additional information to further populate the document to ensure it continues to align with the Quarterly updates provides against the SBUHB annual plan
- The level of risk and an assessment of the adequacy of assurances will be undertaken and included in the next update on the Board Assurance Framework
- The BAF will be monitored by the Risk Management Group in tandem with the Health Board Risk Register (HBRR).
- Every 6 months sections of the BAF to be monitored by relevant Board committees and Management Groups to ensure risk management of the delivery of the strategic objectives.
- Every quarter the Executive Team will review full BAF prior to presentation to Audit Committee.
- Every 6 months the BAF will be presented to the Board for Assurance.

The Internal audit forward plan of business for 2019-2020 included an audit on the BAF commencing in December 2019.

3 GOVERNANCE AND RISK ISSUES

a) Board Assurance Framework (BAF)

The populated BAF is attached at *Appendix 1.* It is important to note that the BAF will continue to be updated so it remains a live assurance tool with exception reports provided to key Committee meetings of the Board as appropriate.

Whilst the Audit Committee will on behalf of the Board oversee the BAF, it is not proposed that the Audit Committee spend time discussing precise wording or risk scores but rather focus on whether the framework meets the Board's needs and whether the most significant risks and assurance arrangements are captured. This work will be supported by the existing arrangements in place that assign risks to key Committees of the Board as appropriate.

It is acknowledged that some risks are Unit specific and that these have and will from time to time be escalated onto the organisational risk register because of the extreme nature of the risk.

c) Link to Audit programmes

A key source of assurance comes from internal, clinical and external audit reports, including Wales Audit Office, Royal College reviews, Delivery Unit reviews and these will be captured in the overall framework to support the Board in the triangulation of issues and assurances required.

Internal Audit
The annual internal audit programme is risk based. The BAF will need to take into account audit activity undertaken and particularly audits resulting in limited or no assurance ratings. It's also important to recognise positive assurance.

Clinical Audit & Effectiveness
The Audit Committee handbook recommends stronger alignment of clinical audit activity as a key source of internal assurance. Clinical Audit plans are now dominated by the Welsh Government National Clinical Audit & Outcome Review Plan (NCA&ORP), although this is complemented by Unit audits. Clinical Audit should more prominently as a key source of Board Assurance. .

External Audit : The Wales Audit Office (WAO)
Undertake a number of performance audits during each year – some are part of a mandated national programme and others are those that are UHB specific – these are informed through previous findings and discussion with the Executive and Audit Committee.

It's important also to note the role of Healthcare Inspectorate Wales and other Regulators e.g. Health & Safety Executive; South Wales Fire & Rescue, along with that of the Community Health Councils, all of whom undertaken planned and unannounced inspection and review work.

4 FINANCIAL IMPLICATIONS
There are no direct financial implications arising from the recommendations in this report.

5 RECOMMENDATIONS

Members are asked to:

- **NOTE** the progress on the development of the Board Assurance Framework (BAF), acknowledging that it is a work in progress and will be continually updated

Governance and Assurance		
Link to Enabling Objectives ***(please choose)***	**Supporting better health and wellbeing by actively promoting and empowering people to live well in resilient communities**

Quality, Safety and Patient Experience

Ensuring the Board and its Sub-Committee(s) makes fully informed decisions is dependent on the quality and accuracy of the information presented and considered by those making decisions. Informed decisions are more likely to impact favourably on the quality, safety and experience of patients and staff.

Financial Implications

There are no direct financial implications arising from this report.

Legal Implications (including equality and diversity assessment)

Ensuring the Board has an effective and evolving Board Assurance Framework (BAF) that supports the Board in delivering the current one year plan, is an essential component of the Board's Governance arrangements going forward.

Staffing Implications

The development of the BAF will require a significant amount of work from the Executive Team and their teams to ensure that the process of mapping is undertaken and that this framework meets the needs of the Board. Progress on the development of the BAF is slower than anticipated due to the pause to await the updated Health Board Risk register, and there was no resource to support this work until May 2019.

Long Term Implications (including the impact of the Well-being of Future Generations (Wales) Act 2015)

The Act requires the Health Board to think more about the long term, how we work better with people and communities and each other, look to prevent problems and take a more joined up approach with partners. There will be long term risks that will affect both the delivery of services, therefore, it is important that you use these five ways of working (Long Term Thinking, Prevention, Integration, Collaboration and Involvement) and the wellbeing goals identified in the Act in order to frame what risks

the Health Board may be subject to in the short, medium and long term. This will enable The Health Board to take the necessary steps to ensure risks are well managed now and in the future.

BOARD ASSURANCE FRAMEWORK (BAF)
2019-2020

Last updated 8 November 2019

Swansea Bay University Health Board Control Framework

High Quality Care

Controls:
Evidenced within:
- Annual Plan
- Commissioning
- Annual Quality Objectives
- intentions and plans
- Capital and Estates Strategy
- Quality Impact Assessment protocol
- Equality Impact Assessment

Assurance: gained via:
- Quality and Safety Committee
- Divisional Quality Groups
- Senior Leadership Team
- Annual Quality Report
- Annual Report and Annual Governance Statement
- Chairs Reports
- Visits and Inspections

Performance Management

Controls:
- Objectives and Appraisals
- Performance targets
- Performance Dashboards and monthly reporting
- Regular Performance and Quality reports
- Concerns and Patient Experience Reports
- Serious Incident Reporting

Assurance: gained via:
- Unit Boards, Service/Ward levels
- Escalation arrangements
- Audits, visits
- Executive Director and Senior Leadership Team meetings
- Quality and Safety, Finance and Audit Committees
- Internal/External Audits

Risk Management

Controls:
- Risk management strategy and Policy
- Board Assurance Framework
- Corporate Risk Register
- Divisional Risk Register
- Reports to the Board, Senior Leadership Team and sub committees
- Policies and Procedures
- Scheme of Delegation

Assurance: gained via:
- Delivery Boards, Service/Ward levels
- Escalation arrangements
- Internal/External Audits, visits
- Executive Director and Senior Leadership Team meetings
- Quality and Outcomes, Finance and Audit Committees

Levels of Assurance

VISION AND STRATGEIC PRIORITIES

First Line
Operational

- Organisational structures – evidence of delegation of responsibility through line Management arrangements
- Compliance with appraisal process
- Compliance with Policies and Procedures
- Incident reporting and thematic reviews
- Compliance with Risk Management processes and systems
- Performance Reports, Complaints and Patient Experience Reports, Workforce Reports, Staff Nursing Report, Finance Reports

Second Line
Risk and Compliance

Reports to Assurance and Oversight Committees

- Audit Committee
- Finance Committee
- Quality and Safety Committee
- Remuneration Committee
- Risk Management Group, Health and Safety Groups etc.

Findings and/or reports from inspections, Friends and Family Test, Annual Reporting through to Committees, Self-Certification

Third Line
Independent Assurance

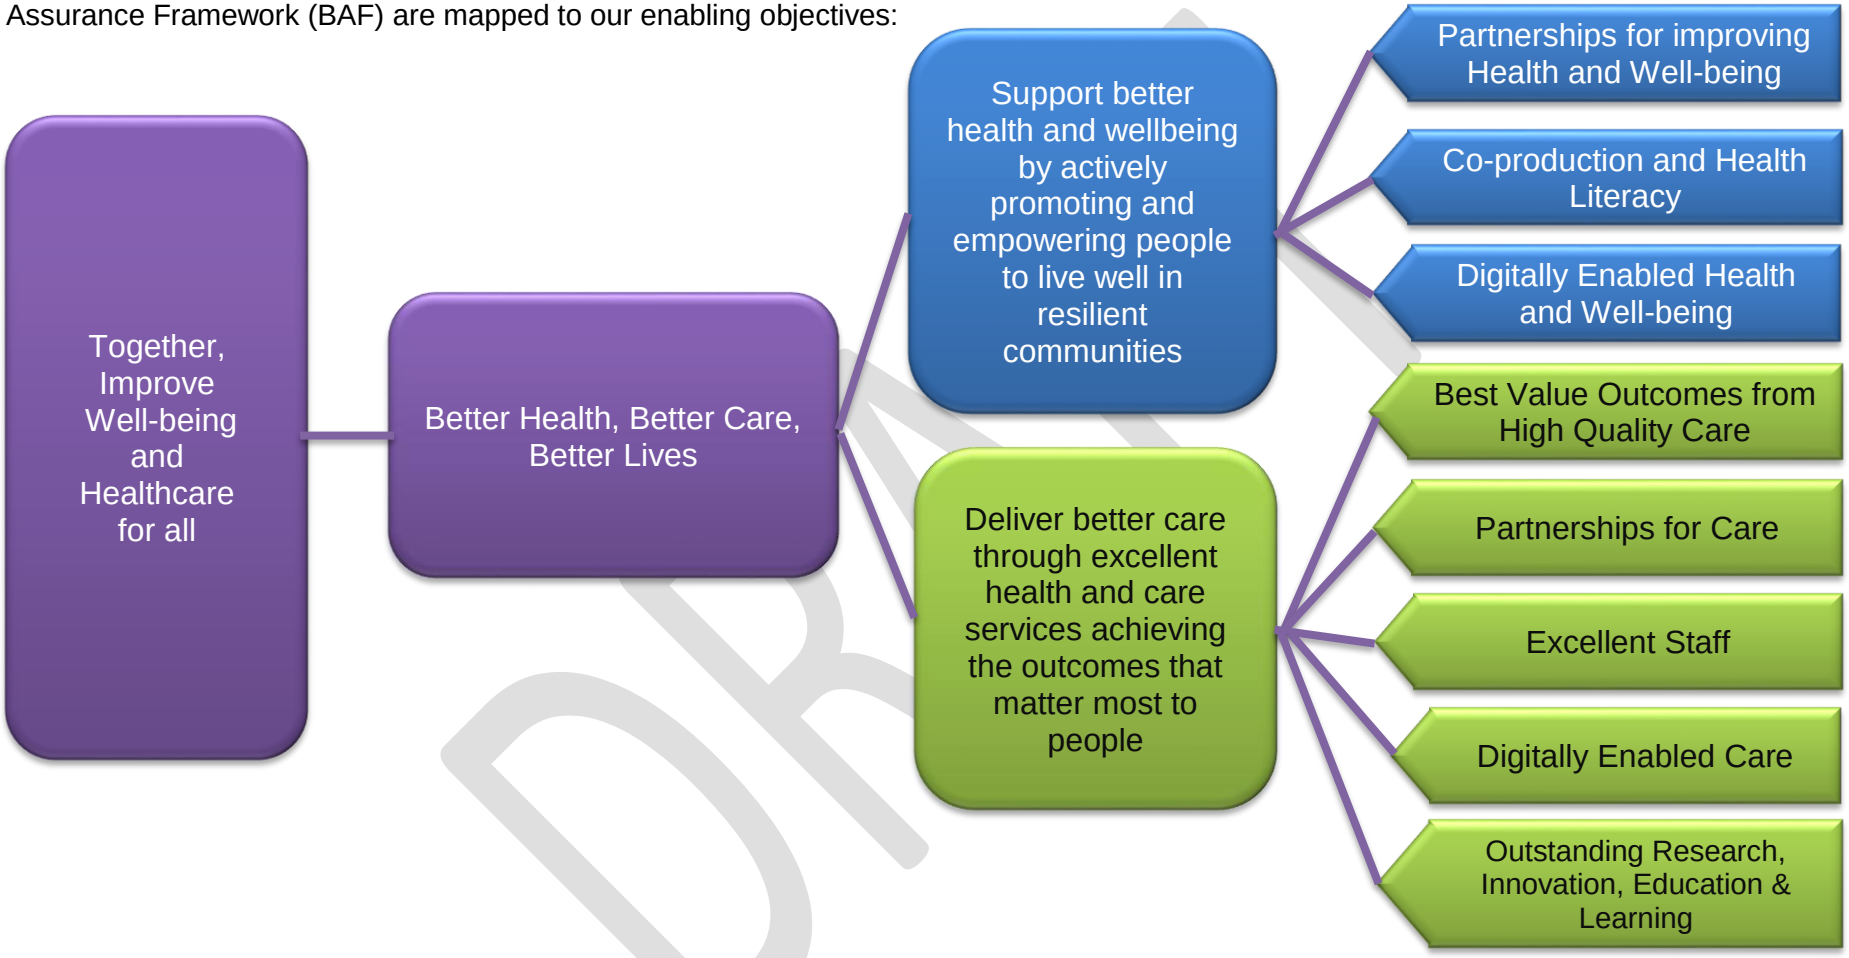
- Internal Audit Plan
- Wales Audit Office (WAO) (Structured Assessment)
- External Audits (e.g. Annual Accounts and Annual Report)
- Health Inspectorate Wales (HIW) Inspections
- Visits by Royal Colleges
- External visits and accreditations
- Independent Reviews

REGULATORS

EXTERNAL AUDIT

Aligning Board Assurance with Swansea Bay University Health Board (SBUHB) Strategy

The Swansea Bay University Health Board (SBUHB) strategy is outlined in the figure below and all risks identified for inclusion on the Health Board Assurance Framework (BAF) are mapped to our enabling objectives:



Board Assurance Framework Summary Against SBUHB Enabling Objectives –

	Q1	Q2
Partnerships for improving Health and Well-being		
Failure to reduce inequalities and deliver improvements in population health for our population		
Co-production and Health Literacy		
Failure to establish and maintain effective relationships with our partners to lead and shape our joint strategy and delivery plans, based on the principles of sustainability, transformation and partnership working		
Digitally Enabled Health and Well-being		
Failure to have IM&T systems in place which do not meet the requirements of the organisation		
Best Value Outcomes from High Quality Care		
Risk that the Health Board will be unable to maintain the quality of patient services and financial sustainability		
Partnerships for Care		
Failure to establish and maintain effective relationships with our partners to lead and shape our joint strategy and delivery plans, based on the principles of sustainability, transformation and partnership working		
Excellent Staff		
Failure to have an appropriately resourced, focussed, resilient workforce in place that meets service requirements.		
Digitally Enabled Care		
Failure to have IM&T systems in place which do not meet the requirements of the organisation		
Outstanding research, Innovation, Education and Learning		
Failure that the Health Board will not be able to embed research and teaching into the care we provide, and develop new treatments for the benefit of patients and the NHS.		
Embedding effective corporate governance		
Failure to meet statutory obligations in relation to corporate governance, including health & safety, infection control, etc. which could result in breaches in standards and other failures leading to significant patient harm, financial penalties and regulatory intervention.		

Key	Improvement	Deterioration	No Change

Approach to Risk Assessment - Risk scoring = consequence x likelihood

	Likelihood				
Consequence	**1 Rare**	**2 Unlikely**	**3 Possible**	**4 Likely**	**5 Almost certain**
5 Catastrophic	5	10	15	20	25
4 Major	4	8	12	16	20
3 Moderate	3	6	9	12	15
2 Minor	2	4	6	8	10
1 Negligible	1	2	3	4	5

For grading risk, the scores obtained from the risk matrix are assigned grades as follows:

1 - 3	Low risk
4 - 9	Moderate risk
8 -15	High risk
16 - 25	Very High risk

The current scores for principal risks are summarised in the following heat map.

	Likelihood				
Consequence	**1 Rare**	**2 Unlikely**	**3 Possible**	**4 Likely**	**5 Almost certain**
5 Catastrophic					
4 Major					
3 Moderate					
2 Minor					
1 Negligible					

Assurance Ratings

Substantial assurance - The Board can take **substantial assurance** that arrangements to secure governance, risk management and internal control, within those areas under review, are suitably designed and applied effectively. Few matters require attention and are compliance or advisory in nature with **low impact on residual risk** exposure.

Reasonable assurance - The Board can take **reasonable assurance** that arrangements to secure governance, risk management and internal control, within those areas under review, are suitably designed and applied effectively. Some matters require management attention in control design or compliance with **low to moderate impact on residual risk** exposure until resolved.

Limited assurance - The Board can take **limited assurance** that arrangements to secure governance, risk management and internal control, within those areas under review, are suitably designed and applied effectively. More significant matters require management attention with **moderate impact on residual risk** exposure until resolved.

No assurance - The Board has **no assurance** that arrangements to secure governance, risk management and internal control, within those areas under review, are suitably designed and applied effectively. Action is required to address the whole control framework in this area with **high impact on residual risk** exposure until resolved.

Levels of Assurance – 1st, 2nd & 3rd

▲	Substantial Assurance	▲	Satisfactory Assurance
▲	Reasonable assurance	▲	Limited assurance

4.1 Operational Performance • TI priority measures summary dashboard and monthly performance report • Unit Performance Reviews • Unit Board meetings reviewing national targets • Remedial action plans in place for each red or amber indicator. • Daily Health Board wide conference calls/ supported by revised HB escalation process, business continuity and major incident plans. • Increased reporting as a result of targeted intervention status. • Weekly calls with Units to support delivery and monitor performance.	• Regular reporting to Executive Team, Executive Board and Health Board/Quality and Safety Committee. • Monthly performance and finance meetings between executive team and service directors. • Executive monitoring/support to achieve improvement plans on a weekly basis. • Detailed performance information reviewed through unit performance meetings and unit boards. • Weekly Service director/COO meeting to ensure implementation of	▲	▲		• Bed utilisation audit undertaken in 2018 to support USC system redesign programme in NPT and Swansea. • The findings of this audit have resulted in the development of the West Glamorgan Hospital to Home transformation programme which has a formal project management structure.		**Unscheduled Care and Stroke:** Action: Working with social care partners to implement the West Glamorgan Hospital to Home transformation service model aimed at delivering more patient care at, or closer to, home, reducing the number of patients awaiting discharge planning in hospital. This programme encompasses the findings of DU			

• Modest investment package agreed to support additional activity to increase capacity. • Supported by Service Improvement Team and through the Patient flow service optimisation work stream of the recovery and sustainability programme. • Winter Plan in place for the Health Board • In relation to planned care the Health Board's profile for numbers of patients waiting over 36 weeks at the end of 2018-2019 was at its lowest level since April 2014, with significant improvement in the longest waiting times (a reduction of 500 patients over the course of the year). • Treat in Turn tools operationalised • Cohort tools operationalised • Support from Cwm Taf Morgannwg UHB re backfill • Support from NPTH re additional orthopaedic waiting lists • Theatre group considering how to increase throughout through theatres • Additional staff training and recruitment (along with short term agency) to increase resilience of Morriston elective theatre • Investment in additional validation to eradicate duplications and review long waiting patients • Creation of a Gold Command to oversee improvements in Ophthalmology • Additional investments with WG – approx. £500K to cover a number of local delivery unit initiatives to reduce overall numbers of follow ups by at least 15% by the year end. • Stroke work ongoing around the development of a Hyper Acute Stroke Unit – a Joint partnership development with Hywel Dda UHB to provide more immediate, focused and rehabilitative care in	improvement actions and monitor performance. • Monthly Health Board USC improvement board chaired by COO to oversee delivery of improvement plans. • Monthly Quality and Delivery meetings with WG and DU. • Morriston delivery unit plan reflects recommendations from external support. • External capacity/demand modelling undertaken in community services to inform sustainable capacity solutions/ system shifts • Monthly performance reports at Performance and Finance Committee and the Board focussing on TI areas. • The 2018-2019 targets agreed with Welsh Government were exceeded • NHS Wales Delivery Unit support provided in house and also support to the RTT meetings • COO/SDU meetings (unscheduled care) • Stroke Delivery Board • Planned care delivery board • Outpatient Transformation Board • WG quality & delivery meetings • National fora, e.g. Planned Care Board/Outpatient Modernisation, Stroke Implementation Group etc	▲ ▲ ▲ ▲ ▲ ▲ ▲		▲ ▲ ▲ ▲ ▲ ▲ ▲			report on the Right Place Right care review. Implementation of the ambulance handover plan agreed between the HB, WAST and NCCU. Implementation of the USC plan and HB winter plan. Action: Promotion of FAST, continued development of TIA services, establishing a Thrombectomy pathway through WHSSC. **Planned Care** Action: Improve Theatre efficiency and utilisation including ENT/ orthopaedics access to Singleton and Neath Port Talbot theatres.- The plan to establish all day ENT operating at Singleton Hospital in Q1 has been revise as it is not possible to achieve this by September due to, in the main, anaesthetics pressures. The revised plan is to target an October start and the plan and milestones will be revised to reflect this. Action: General Surgery access to			

the first 72 hours of a stroke patients care.							Singleton theatres to utilise for routine and high activity capacity - The plan to establish one all day General Surgery operating list at Singleton Hospital and one all day list at Morriston has been revised. Morriston are on track to start in September. However it has been agreed not to commission the Singleton list. The plan and future milestones will be revised to reflect this.			
4.2 Clinical Standards & Audit Performance • National Clinical Audit Programme • NICE Guidance	• Reports to the Clinical Audit group • Unit Clinical audits • Delivery unit Clinical audit group	▲ ▲	▲		• IA report on Clinical Audit & Assurance (ABM-1819-022) – Limited Assurance • IA report Data Quality: Delayed Follow ups (ABM-1819-028) • Health Inspectorate Wales (HIW) - Kris Wade Report • Health Inspectorate Wales (HIW) - Dyfed Road Health Centre • Health Inspectorate Wales (HIW) - West Cross Lane Dental Surgery • Health Inspectorate Wales (HIW) - Neath South Community Mental Health Team – The Forge Centre • Audit committee report on Ambulance handover July 2018. • Cwm Taf UHB Maternity Review In March 2019 the RCOG published a report concerning the maternity services at CTMUHB and Welsh Government sought assurance	Schedule of national, HB mandated and unit audits needs to factor in re-audits to monitor improvements made (plan, do check cycle) Introduce a maturity matrix to map progress and assess areas for further development.	Introduce an oversight group to oversee the structure and schedule of clinical audits. Including the management of local audits at unit/department level. Gather business intelligence through benchmarking with other leading NHS organisations on audit schedules and clinical monitoring processes.			

					on the maternity service provision in place across the seven HB's in Wales. SBUHB submitted a report to Welsh Government advising a review was being undertaken.					
4.3 Infection Control Targets (HBRR4) • Infection Control Sub Group • Bug stop quality improvement programme • Infection control team support the clinical teams for issues relating to infection control • ICNet information management system for infections is in place	• Regular monitoring on infection rates at Quality and Safety Committee • IA report Infection Prevention & Control July 2019 (1920-019) – Reasonable Assurance • Regular monitoring through TI meetings with Welsh Government • Policies, procedures and guidelines in place • Regular reporting through internal processes • Additional staff in post including permanent infection control doctor, decontamination lead and assistant director of nursing	▲ ▲ ▲	▲	▲ ▲	None identified	ICNet provides information linked with PAS relating to patients who have been inpatients since the connection was made therefore additional manual records are maintained by the infection control team creating additional work and some duplication.	Further focused work will be on environmental decontamination and infection control needs to be considered for all refurbishment and new works to ensure our hospitals provide suitable facilities for infection control.			
4.4 Quality & Safety • Annual Plan/IMTP • Clinical Service Plan • Regional Clinical Services Plan • Reports to Board & Quality & Safety Committee on: ○ Primary & Community Care ○ Unscheduled Care & stroke ○ Planned Care ○ Cancer ○ Mental Health & learning & Development ○ Women & Children & Young People ○ Older People ○ Quality, Safety & Patient Experience • Quality & Safety Assurance Framework • Quality & Safety Assurance Group	• Quarterly annual plan reporting to Performance & Finance Committee • Reports to the Quality & Safety Committee • Reports to the Monthly Quality & Safety Assurance Group meetings • Monthly Health and Care Standards Steering group meetings and Unit/Directorate quarterly updates on the HCS standards • Health and Care Standards mini scrutiny panel • Policies, procedures and guidelines in place • Development of transitional care Unit at Singleton • Crisis pathway reviewed	▲ ▲ ▲ ▲ ▲	▲		• IA Report World Health Organization (WHO) Checklist (1920-021) – July 2019 Limited Assurance • Health Inspectorate Wales (HIW**) -** Kris Wade Report • Health Inspectorate Wales (HIW) **-** Dyfed Road Health Centre • Health Inspectorate Wales (HIW**) -** West Cross Lane Dental Surgery • Health Inspectorate Wales (HIW) **-** Neath South Community Mental Health Team – The Forge Centre • Audit committee report on Ambulance handover July 2018.		The Quality & Safety Assurance Framework will be presented to the Quality & Safety Committee 12 December 2019 and will be formally launched in 2020.			

• Quality Improvement panel • Health and Care Standards Annual Self-assessment	and in place for crisis team within the HB. • Discussion around the development of adolescent facilities within acute and CAMHS • Unscheduled care, development of one port of entry for all CYP. Business plan being developed and project team convened. • Continuing care funding CYP • HCAI - agreement for addition resource to focus on community acquired HCAIs will assist in the prevention programme and reduce rates and in turn admissions to hospital relating to HCAIs. The gap around this is that there is currently no resource but this is being addressed and will be in place for the next financial year. There is a considerable amount of work underway but this is captured as part of the TI and ICC work streams. • IA Report Falls Prevention & Management (1920-020) September 2019 – Reasonable Assurance • IA Report Medicines Management (incl CD's & incidents) June 2019 – Reasonable Assurance • IA Report Hospital Sterilization & Disinfection Unit (HSDU) (1920-037) – Reasonable Assurance Sept 2019 • IA Report MH&LD Unit Governance (1920-034) Reasonable Assurance • IA Report Cardiac Services Risk Management (1920-035) Reasonable Assurance • Annual Quality Statement	▲ ▲ ▲ ▲ ▲		▲ ▲ ▲ ▲ ▲	• Cwm Taf UHB Maternity Review In March 2019 the RCOG published a report concerning the maternity services at CTMUHB and Welsh Government sought assurance on the maternity service provision in place across the seven HB's in Wales. SBUHB submitted a report to Welsh Government advising a review was being undertaken.					

5. Enabling Objective: Partnerships for Care

Principal Risk : Failure to establish and maintain effective relationships with our partners to lead and shape our joint strategy and delivery plans, based on the principles of sustainability, transformation and partnership working

Corporate Risks	**Unit Risks**
• HBRR 11 – Healthcare Model for Ageing Population • HBRR 15 – Population Health Improvement	• 1797 – WAST delay in handover • 1894 – WAST escalation delay • 1418 – Patient Safety CAMHS Safeguarding

Executive Lead: Director of Strategy — **Assuring Committee:** Health Board
