Instructions for using Prosil Silicone Stick

Directions for use

The silicone should be applied in a thin layer to the affected area three times a day, following scar massage, using the instructions below.

- Wash your hands.
- Clean the area to be treated with mild non-perfumed soap and water and pat dry.
- Apply Prosil across scar as directed by your key worker.
- Allow to air dry.
- Cosmetics and sun-cream can be applied over Prosil when it is completely dry.

Care of gel

- Can be used around eyes/mouth but caution should be used to prevent the product from entering these areas.
- Keep out of reach of children.
- Store at room temperature
- Do not use after the expiry date (EXP) printed on the pack.

If you require any further guidance or have any questions about the silicone gel or if the scar area shows any evidence of skin irritation, rash, open or weeping areas, remove gel from your skin and contact your key worker.
