You asked:

Are you able to advise the current waiting times for a cataract operation?

Our response:

Unfortunately is isn't possible to exact expected or current waiting times for a patient on the waiting list for a cataract operation in SBUHB.

Waiting times for these operations can vary from patient to patient depending on their specific circumstances.

Therefore, to best answer your question, we have provided the amount of time the majority of patients on our waiting list have been waiting for a cataract operation. This figure excludes any exceptional cases, who may have longer waits than usual for a variety of reasons personal to their individual cases.

As at 31st October 2022, 95% of patients waiting for a cataract operation have waited 125 weeks or less.

At present there are 1820 patients on the waiting list for a cataract operation.

The Covid-19 pandemic has caused huge disruption to NHS services, not just in Swansea Bay but across the UK.

As with all health organisations, during the pandemic we suspended non-emergency services and appointments so our hospitals did not become overwhelmed while we cared for those seriously ill with the virus. Inevitably this has affected waiting times as it has done with all other health boards.

Clearly this was not something any of us would have wanted and we were extremely conscious of the potential consequences for patients.

Since the start of the pandemic we have continued to care for those requiring urgent treatment, and following the first wave we reintroduced many of our services and have done our best to keep disruption to a minimum throughout the subsequent waves, often with change in place to protect patients and staff, but continuing to provide as much planned care as possible.

Our hard-working staff have supported this by coming up with innovative solutions to protect services, adapt services to continue recognising the existence of the virus and introduce new ones specifically as a result of the virus – there are numerous examples on our website.
