You asked:

Can you inform me of what your current process for managing follow up reviews of those patients who have had metal on metal joint replacement is?

The Trauma and Orthopaedic Service monitor the metal on metal joint replacement patients via a database managed by a Lead Consultant and administrative support. Patients are monitored clinically via blood tests and outpatient clinic follow up appointment if appropriate.

During the COVID-19 pandemic, the department had experienced delays due to conflicting priorities. However, it is in the process of being fully re-established back to pre-pandemic levels.
